Road Pricing: Theory, Empirical Assessment and Policy Börje Johansson, Lars-Göran Mattsson, 2012-12-06 Road pricing tolls etc as a means of generating revenue for infrastructure investment has become a major policy option in both Europe and North America It can also be used as a policy in the management of traffic demand and flow environmental objectives and optimal resource allocation as regards the size of investments Road pricing is assumed to be able to solve many problems simultaneously congestion control pollution reduction and investment financing This volume assembles and assesses theoretical knowledge empirical results and experiences of actual road pricing In addition the impact of new information technology on future policy formulation is considered *Megacity Mobility* Zongzhi Li, Adrian T. Moore, Samuel R.

Staley, 2021-12-14 World population growth and economic prosperity have given rise to ever increasing demands on cities transportation planning and goods movement This growth coupled with a slower pace of transportation capacity expansion and deteriorated facility restoration has led to rapid changes in the transportation planning and policy environment These stresses are particularly acute for megacities where degradation of mobility and facility performance have reached alarming rates Addressing these transportation challenges requires innovative solutions Megacity Mobility grapples with these challenges by addressing transportation policy planning and facilities in a multimodal context It discusses innovative short and long term solutions for meeting current and future mobility needs for the world's most dynamic cities by addressing the influence of urban land use on mobility 3D spiderweb transportation planning travel demand management multimodal transportation with flexible capacity efficient capacity utilization driven by new technologies innovative transportation funding and financing and performance based budget allocation using asset management principles It discusses emerging issues highlights potential challenges affecting proposed solutions and provides policymakers planners and transportation professionals a road map to achieving sustainable mobility in the 21st century Zongzhi Li is a professor and the director of the Sustainable Transportation and Infrastructure Research STAIR Center at Illinois Institute of Technology IIT Adrian T Moore is vice president of policy at Reason Foundation in Washington D C with focuses on privatization transportation and urban growth and more Samuel R Staley is the director of the DeVoe L Moore Center in the College of Social Sciences and Public Policy at Florida State University *Use of Video in Traffic Management (1991-1993)*, 1993 **Road Pricing**

Georgina Santos, 2004-07-31 Traffic congestion affects towns and cities everywhere and in some places it is regarded as one of the most urgent and important problems in need of a solution Road pricing is undoubtedly recognised as an effective traffic demand management tool The recent London congestion charging scheme seems to be showing that public and political opposition is not insurmountable Thus the ghost that prevented the introduction of a policy supported by transport economists for over 80 years seems to have disappeared or at least weakened The book contains twelve papers useful to different types of audience such as researchers and postgraduate students civil servants policy makers and consultants The

first part is mainly theoretical and concentrates on second best congestion pricing including pricing in urban contexts the impact on the performance of the road network optimal locations and charge levels dynamic aspects such as time variation of tolls potential impacts of road pricing on costs and service quality of public transport buses and efficiency costs and transport sector effects of different types of pricing when they guarantee a balanced budget per mode The second part contains chapters that describe the schemes in place around the world such as Singapore Norway London and the US The volume is an update of the state of the art on the subject and the first one to have been written and appear after the London scheme was implemented and to contain an assessment of its preliminary impacts

Conference Record of Papers Presented at the ... Vehicle Navigation and Information Systems Conference (VNIS ...), 1992 *Orbital Motorways*, 1990

Increasing urbanization and the growth of private car commuting coupled with an increase in road freight have placed excessive demands on many urban road systems Orbital motorways provide an effective solution by removing through traffic and releasing road space for local journeys This book reviews the strategies adopted to address these issues by a variety of authorities in the UK France the USA and South Africa

Road & Transport Research, 1999 **The British National Bibliography** Arthur James Wells, 1996 *Road Charging in the 90s* Beryl Blair, 1994 The increase in traffic congestion in the last 40 years in the UK and overseas has been phenomenal Faced with this problem governments need to find a way to restrict road use to essential traffic and to raise money to finance new road building One option adopted by many countries with varying degrees of success is the use of toll roads or more complex methods of road charging This book provides an overview of charging policies and legislation looking at all the options available and assessing the likely effects on both domestic and commercial traffic Following an overview of the subject this guide is divided into two sections the legislation and policy behind road charging with chapters focusing on the UK and Europe and on London as a special case and recent practice with chapters on road charging models and technologies and on case studies from the UK Europe Australia the Far East US and Canada Each chapter provides both a brief review of the subject and a list of key references for further reading The guide also contains detailed indexes
