Spitzberg, William R. Cupach, 2013-06-17 This collection of essays represents a follow up to the editors 1994 publication The Dark Side of Interpersonal Communication In the preface to that collection of essays they argued that To fully understand how people function effectively requires us to consider how individuals cope with social interaction that is difficult problematic challenging distressing and disruptive In this companion volume the focus expands from social interaction to close relationships Aside from the inherent need to investigate the bad as well as the good of interpersonal relationships the editors and their colleagues simply find the dark side metaphor to be intellectually arousing It stimulates investigation of important yet often neglected phenomena and it especially encourages consideration of the hidden and forbidden and the paradoxical and ironic elements of human relating This volume assembles the cutting edge work of first rate scholars from the ranks of communication psychology sociology and cognate disciplines As in the previous text the subject matter and stylistic approaches are diverse reflecting the broad and interdisciplinary domain that is the dark side of human affairs The selection of topics is somewhat selective reflecting only a sample of emerging scholarship in the interdisciplinary study of relationships These internationally recognized scholars examine various topics related to the dark side including fatal attractions jealousy and envy misunderstanding gossip conflict codependence sexual coercion stalking

relationship termination unrequited love and mental health problems in relationships Some chapters present original data and models whereas others reconfigure the way in which the understandings of relationships can be better understood In addition the bookend chapters examine the ideology nature and problems of dark side scholarship Collectively the scholarly journeys made in this volume are intended to illustrate the complexities both moral and functional involved in close relationship processes The intent is neither to valorize nor demonize the darker aspects of close relationships but rather to emphasize their importance to the day to day doing of relationships Only by accepting such processes as integral to relationships can their role be fully understood

**The Dark Side of Dharma** Anna Lutkajtis, 2021-03-24 A dive into the less known and undesirable side effects of meditation and mindfulness Researcher Anna Lutkajtis investigates why these negative ramifications of meditation and mindfulness which are well known in spiritual and religious traditions have been ignored in contemporary secular contexts such as Western psychology Lutkajtis research reveals that while meditation is commonly portrayed as a practice that is overwhelmingly positive a growing number of research studies and anecdotal reports suggest that meditation can also have negative effects Some meditators believe that these adverse effects are a normal part of the contemplative path and a welcome sign of progress For others such effects are completely unexpected and can be psychologically harmful In religious traditions like Buddhism difficulties associated with meditation are acknowledged and are usually viewed as milestones on the path to enlightenment or the result of an unbalanced practice In such traditional contexts meditation teachers are equipped to deal with adverse effects if and when they arise However in the modern West meditation adverse effects have been overlooked under researched and generally misunderstood Given the current popularity of meditation Lutkajtis argues that it is important to understand why meditation adverse effects have been ignored in contemporary secular settings

*THE DARK SIDE OF GOD'S LIGHT* LAKHEM RA-SEBEK,2013-12-26 This work is an introspective approach to major religious texts We are compelled to see things in the way that they have been prepared for us to see though for convenience we suffer the burden of ignorance Beyond the conventionally accepted methods of religious study there is a vast wealth of information waiting for those willing to inconvenience themselves out of the grasp of ignorance The true master does not cling to systems or set ceremonial practices they simply see systems and practices as bridges that lead to higher ground The master is not even attached to his own ideas In fact at the level of mastery there is no attachment there is only investment Investment in those actions that make sense and bring about results the present is the masters arena
