Aruka,2024-05-09 This textbook presents a new way to visualize or imagine the evolutionary architecture of economics to judge both its practical outcomes and its ultimate value Evolutionary economics employs an Aristotelian architecture The cognitive value of this imagination H1 must be directly relevant to the evolutionary theory and practice of designing the architecture of the economic system Mainstream economics completely ignores design value in order to concentrate on the ideal Platonic vision of the economy The current system is no longer one that converges on a constant entity because the system is constantly evolving The advent of the digital economy is an indispensable next step and computational power and algorithmic rationality are increasingly dominating the economic system and complicating it In today's society neither fault nor malice matters in the algorithmic or human system There is little room left for the effective working of human reason Correspondingly the meanings of money exchange the market system auctions production consumption and the currency transaction system are poised to change In most cases there will be digital counterparts A smart contract tied together with DLT for example makes it possible to design an economically well behaved peer to peer P2P system which ranges from the micromarket to the international currency transaction system The introduction of this technology and its architectural design may suggest what a truly decentralized future entails This change may also bring about a new understanding of existing social consensus and practice Thus the implementation of these considerations naturally leads to a new style of chapter structuring in this book from the classical analytical approach to exploring computational methods and digital tools in many cases the problems presented in each chapter are combined with discussions of a respective computational method and its practical value The Intuitive Trader Robert Koppel,1996-05-03 Cultivate the skills necessary to follow your business
