The Mysterious World Of Caves International Library:

The Mysterious World of Caves Ernst W. Bauer, 1971 Explains many facts about caves how they are formed the various types plant and animal life the formation of stalactites and the evidence of prehistoric use by early man **Mysterious World of Caves** Ernest Bauer, 1978-09-01 **The International Library of Masterpieces Literature Art and Rare Manuscripts** Harry Thurston Peck, Frank R. Stockton, Nathan Haskell Dole, Julian Hawthorne, Caroline Ticknor, 1901 **The Mysterious World Cave** Ernst W. Bauer, 1971 The Publishers' Trade List Annual, 1987 **The Mysterious World of Caves** Ernst Bauer, 1971 **The School Librarian**, 1992 **The Secret Archives of the Vatican** Maria Luisa Ambrosini, Mary Willis, 1996 Studies in Speleology, 1972 **A Guide to Speleological Literature of the English Language** Diana E. Northup, 1998 This is a family story of America's most famous cave explorer who was trapped and died in Sand Cave in 1925 That story has been told many times but never before has the complete life of Floyd Collins been presented Floyd's younger brother Homer tells how Floyd was fascinated with caves from his childhood of his discovery of the famous Crystal Cave on the home property and of the rescue attempts from the viewpoint of a brother so devoted that his extraordinary efforts to save Floyd were rewarded by his being removed from the premises while others inexperienced in working in caves carried on the unsuccessful attempt It is a warm story of a man whose love in life was exploring caves a man who endured his grim death with dignity and pride in his vocation Page 4 of cover **History of Cave Science** Trevor R. Shaw, 1992 This book is mainly concerned with the geomorphological aspects of caves karst hydrology speleogenesis and the origin of speleothems Cave exploration was a necessary prerequisite for such studies and its progress is traced from prehistoric times to the systematic regional investigations of the 17th century and later The first extensive work was in Slovenia stimulated by the practical importance there of karst hydrology for water supply and flood control Large karst springs had long attracted attention and several hypotheses had already been advanced according to some they were supplied by water raised from the sea others explained them by condensation and finally their source as rainfall was accepted The study of intermittent karst lakes led eventually to the postulation of what amounted to a water table A true understanding of speleogenesis and the origin of speleothems depended on a knowledge of the chemistry of limestone solution which in its turn depended on the rejection of phlogiston at the end of the 18th century Before that time only mechanical erosion was normally conceived as a means of removing particles of solid rock and subsequently redepositing them to form speleothems although a few people earlier in the century had involved an unspecified aerial acid There were also several more primitive theories including the formation of caves by tectonic catastrophes by erosion as the water of Noah's Flood drained back underground and the inflation of cavities in still soft limestone by decomposition gases For many years speleothems were thought to possess a low form of life growing like plants rather than by accretion After the action of carbon dioxide in speleogenesis was appreciated a new question arose whether caves could be formed in the saturated zone

or whether they were due solely to vadose water For many years the problem was not recognised but violent controversy was taking place over it by the end of the 19th century History of Cave Science Trevor Royle Shaw,1979 **Adventure of Caving** David R.
