

The Modulor

Le Corbusier

The Modulor:

Modulor 2 1955 Le Corbusier, 2000 *The Modulor* Le Corbusier, 2000 **The Modulor and Modulor 2** Fondation Le Corbusier, 2015-04-24 In the years 1942 to 1948 Le Corbusier developed a system of measurements which became known as Modulor Based on the Golden Section and Fibonacci numbers and also using the physical dimensions of the average human Modulor is a sequence of measurements which Le Corbusier used to achieve harmony in his architectural compositions Le Modulor was published in 1950 and after meeting with success Le Corbusier went on to publish Modulor 2 in 1955 In many of Le Corbusier's most notable buildings including the Chapel at Ronchamp and the Unité d'habitation evidence of his Modulor system can be seen These two volumes form an important and integral part of Le Corbusier's theoretical writings

The Modulor Le Corbusier, 1968 *The Modulor* Le Corbusier, 1954 **The Modulor by Le Corbusier 1943-54. Revised and Extended Edition.** Juan Manuel Franco Taboada, 2018-04-02 This book is a revised and extended version of the article that I wrote and published in 1996 22 years ago now which for some time I have felt the need to update Some parts of the text have been modified others removed and others extended all as a result of the maturity that I have gained after all these years of experience I have of course also changed some of my own pictures which were the result of a surprising and naive confidence in myself Some of the original images from my old edition of the Modulor have been retained I suppose out of pure nostalgia and a love for one's own books despite the fact that they could have been replaced by others that were better scanned than the originals produced with an old hand held scanner and others have been removed I believe that this evolved version of the original article will be worthy of greater recognition from the large number of people from around the world who have been and are kind enough to read it Manuel Franco A Coruña April 2018 *The Projective Cast* Robin Evans, 2000-08-25 Robin Evans recasts the idea of the relationship between geometry and architecture drawing on mathematics engineering art history and aesthetics to uncover processes in the imagining and realizing of architectural form Anyone reviewing the history of architectural theory Robin Evans observes would have to conclude that architects do not produce geometry but rather consume it In this long awaited book completed shortly before its author's death Evans recasts the idea of the relationship between geometry and architecture drawing on mathematics engineering art history and aesthetics to uncover processes in the imagining and realizing of architectural form He shows that geometry does not always play a stolid and dormant role but in fact may be an active agent in the links between thinking and imagination imagination and drawing drawing and building He suggests a theory of architecture that is based on the many transactions between architecture and geometry as evidenced in individual buildings largely in Europe from the fifteenth to the twentieth century From the Henry VII chapel at Westminster Abbey to Le Corbusier's Ronchamp from Raphael's St Eligio and the work of Piero della Francesca and Philibert Delorme to Guarino Guarini and the painters of cubism Evans explores the geometries involved asking whether they are in fact the stable underpinnings of the creative intuitive or rhetorical aspects of architecture In

particular he concentrates on the history of architectural projection the geometry of vision that has become an internalized and pervasive pictorial method of construction and that until now has played only a small part in the development of architectural theory Evans describes the ambivalent role that pictures play in architecture and urges resistance to the idea that pictures provide all that architects need suggesting that there is much more within the scope of the architect's vision of a project than what can be drawn He defines the different fields of projective transmission that concern architecture and investigates the ambiguities of projection and the interaction of imagination with projection and its metaphors *Le Corbusier, the Dishonest Architect* Malcolm Millais, 2018-01-23 This is not a book for architects but for all those that have suffered consciously and unconsciously from modern architecture and have wondered how it came about This was largely due to one man an architect called Le Corbusier For some he was a genius but the truth is he was a sham a fake a charlatan whose only gift was for self publicity He was the most influential architect of the second half of the twentieth century his influence overwhelmed the architectural profession on a global scale who swallowed his publicity whole and still hold him in awe For the rest of the world the mere mortals his influence was disastrous as traditional buildings were destroyed and replaced by featureless boxes of varying sizes imposing a dreariness hitherto unimagined As usual it was the poor who suffered most as they were herded into tower blocks These were often grouped into estates that ringed many towns and cities which then degenerated into high rise slums with all the well known attendant social problems This book exposes the myths that surround Le Corbusier detailing the endless failures of his proposals and his projects These were due to his profound dishonesty both as a person and as an architect His legacy was an architectural profession that believed and still believe they were designing buildings based on logic functionality and honesty whereas they were doing the opposite

Architectural Principles in the Age of Cybernetics Christopher Hight, 2007-12-12 A theoretical history of anthropomorphism and proportion in modern architecture this volume brings into focus the discourse around proportion with current problems of post humanism in architecture alongside the new possibilities made available through digital technologies The book examines how the body and its ordering has served as a central site of architectural discourse in recent decades especially in attempts to reformulate architecture's relationship to humanism modernism and technology Challenging some concepts and categories of architectural history and situates current debates within a broader cultural and technological context Hight makes complex ideas easily accessible Extensively illustrated and written without academic jargon for an informed but non specialized architectural audience this book elucidates the often obscure debates of avant garde architectural discourse and design while demonstrating how these debates have affected everyday places and concepts of architecture As a result it will appeal to professional architects academics and students combining as it does an insightful introduction to the fundamental issues of architectural history and theory over the past fifty years with entirely new formulations of what that history is and means Reinventing Modern Architecture in Greece Marianna

Charitonidou,2025-05-30 This book examines the connection between the politics of the Marshall Plan and urban planning and identifies the key players such as the Greek architect and urban planner Constantinos A Doxiadis and the Italian industrialist Adriano Olivetti It also explores the architects of the Mataroa mission who played a vital role in the cross fertilisation between France and Greece and the role of travel to Greece for architects during the 19th century This book delves into the work of Constantinos A Doxiadis Adriano Olivetti Alison and Peter Smithson Iannis Xenakis Takis Zenetos Henri Lefebvre Cornelius Castoriadis Aris Konstantinidis Dimitris Pikionis and others It sheds light on how Doxiadis introduced ekistics as a novel approach to understanding the science of human settlements This book proposes that the manner in which these aforementioned architects and urban planners addressed the role of technology in everyday life and the relationship between society history culture nature architecture and urban planning could enrich our ongoing methods and debates on architecture urban planning ecology social equity and democracy This book is based on extensive archival research and will be of interest to architects artists researchers and students and scholars in architecture architectural history and theory art urban sociology cultural theory science and technology studies philosophy ecology cybernetics and aesthetics

The Familiar and the Unfamiliar in Twentieth-century Architecture Jean La Marche,2003 Matching the texts the architects wrote with the buildings they were designing contemporaneously he focuses on the language employed in discussing the subject to reveal the author architects distinct voices and points of view BOOK JACKET

Le Corbusier Stanislaus von Moos,2009 Originally published in Germany in 1968 this first comprehensive and critical survey of Le Corbusier s life and work soon became the standard text on the architect and polymath French Spanish English Japanese and Korean editions followed but the book has now been out of print for almost two decades In the meantime Le Corbusier s archives in Paris have become available for research resulting in an avalanche of scholarship Von Moos critical take and the basic criteria by which the subject is organized and historicized remain surprisingly pertinent in the context of this recent jungle of Corbusier studies This new completely revised edition is based on the 1979 version published in English by the MIT Press but offers a substantially updated body of illustrations Each of the seven chapters is supplemented by a critical survey of recent scholarship on the respective issues An updated edition of this acclaimed book an essential read for students of architecture and architectural history

Le Corbusier. Le Couvent Sainte Marie de La Tourette / The Monastery of Sainte Marie de La Tourette Philippe Potié,2015-04-24 in 1952 Le Corbusier was commissioned to dwell in the silence of men of prayer and study and to construct a church for them The result was his impressive Convent of La Tourette marking a significant step in modern religious architecture Beginning with the rectangular form common to the Cistercian monastic tradition he created a building whose stark form contrasts beautifully with the organic elements of the interior court and the grasslands surrounding it The church itself is a model of simplicity the cement has been left rough and the well located sources of light evoke a feeling of silence and reflection The order s precept of prayer study and reflection is aptly mirrored

in the architecture Like the other Le Corbusier Guides published by Birkh user this volume provides a wealth of plans details photographs and information on this building which today is also a conference centre

Le Corbusier and the Concept of Self Simon Richards, Le Corbusier, 2003-01-01 Filosofische analyse van het zelfconcept van de Zwitsers Franse architect 1887 1965 herwaardering van zijn motieven als stadsplanoloog en nieuwe inzichten met betrekking tot zijn intellectuele relaties met andere leden van de avantgarde van de twintigste eeuw

The Life and Work of Jerzy Sołtan Szymon Ruszczewski, 2023-12-11 This book is the first comprehensive monograph on Polish modern architect Jerzy Sołtan's work including his designs theory and teachings in Poland and America based on extensive archival research and oral history interviews with former students The Life and Work of Jerzy Sołtan takes the reader on a journey to both sides of the iron curtain the communist Poland and the capitalist United States contributing to the existing scholarship on modernism in post socialist countries on CIAM and on Team 10 It pictures Sołtan as a central player in the history of modernism building on his own contribution and on close relationships with Le Corbusier and Team 10 This book illustrates not only Sołtan's work but also his life and how it influenced twentieth century architecture Looking in detail at his designs and texts enables the reader to discover how modern architecture tendencies can fit into a larger geopolitical context and how designs can be true manifestos to an architect's theory The reader will be immersed in a series of different contexts from communist Poland the vibrant academic atmosphere at Harvard to lively discussions on the future of modern architecture This publication will be of particular interest for those studying modern architecture in Central Europe and in post socialist countries in particular Poland Architects designers architectural and design students and modern architecture enthusiasts will find this publication on the last modernist architect revealing new perspectives thanks to the unpublished and unresearched sources

The Architectonic Colour Jan de Heer, 2009 This book is an account of a significant aspect of Le Corbusier's work the relationships between form and colour The book relates the way in which he arrived at a personal architectonic polychromy in the early 1920s and how his theories relating to Purism developed

Disciplining Bodies in the Gymnasium Patricia Anne Vertinsky, Sherry McKay, 2004 The prize winning War Memorial Gymnasium at the University of British Columbia is discussed here examining what the building's design construction and shifting functions reveal about the university's values during the post war years

Revolutionary Horizons Abigail McEwen, 2016-01-01 Following the trajectories of two pioneering artist groups this groundbreaking book explores the development of abstract art and its political stakes in 1950s Cuba

The Grid Allen Hurlburt, 1978

Le Corbusier. The Villa Savoye Jacques Sbriglio, 2015-04-24 With its uncompromising and clear construction the Villa Savoye completed in 1931 established Le Corbusier's reputation as an undisputed master of twentieth century architecture Andr Malraux placed it on the historic register in 1964 In this guide historic documents and new photographs provide an in depth presentation both to visitors to the site and to interested readers at home

The Top Books of the Year The Modulator The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the fascinating narratives that have enthralled audiences this year. The Modulator : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
