Skeletal System:

Skeletal System Kristin Petrie, 2006-08-15 Through engaging text readers learn about the human body's skeletal system which is made up of all the bones in the body. The book explains that bones hold you up, protect delicate organs such as your heart, help you move, and store fat, phosphorus, and calcium. Readers learn that babies are born with 300 bones, some of which are made of cartilage. The hardening and fusing of bones as babies grow is discussed. Also highlighted are bone fractures and how they heal, diseases that affect the skeletal system such as arthritis and osteoporosis, and how to care for the skeletal system with a healthy diet, plenty of calcium, and lots of exercise.
