It has more images showing how to age birds than any comparable guide, and its handy compact size makes it practical for taking out into the field. The book is based on a long running series of identification features in Bird Watching magazine. Author Dominic Couzens and artist David Nurney have spent years compiling the field notes and artworks for this series, and here their efforts are drawn together and made complete in a single volume that is easy to carry in the field and practical for birders to use. In addition, they have expanded the species list from the magazine series and added many new birds, including the likes of Subalpine Warbler, Short-toed Lark, and Red-rumped Swallow. In total, the book covers more than 230 species, with easy-to-identify species such as Magpie and Kingfisher given minimal coverage so that the more difficult ID issues can be covered as fully as possible.
