attacked this problem over more than two centuries without arriving at a definite answer The introduction of computers in the last half a century has revolutionized the study now many answers have been found while new questions about the three body problem have sprung up One of the most recent developments has been in the treatment of the problem in Einstein's General Relativity the new theory of gravitation which is an improvement on Newton's theory Now it is possible to solve the problem for three black holes and to test one of the most fundamental theorems of black hole physics the no hair theorem due to Hawking and his co workers

Understanding Einstein's Theories of Relativity Stan Gibilisco,1991-01-01 Clear concise exposition of both the special and general theories of relativity intended for nonscientific readers with a knowledge of high school math Topics include simultaneity time dilation length contraction the possibility of travel to a distant star non Euclidean geometries black holes and the structure of the universe 158 illustrations
