### **Teaching Counselors and Therapists**

Karen Eriksen, Garrett McAuliffe, 2001-08-30 A guide to innovative mental health education is urgently needed Despite the hundreds of programs in existence for training students in counseling human service social work and psychology teachers in such programs have relied on an informal network of information exchange to guide their teaching practice Yet constructivist and developmental theories now point to sound innovative practices for teaching This volume delineates those practices Despite years of research on effective adult education university teaching fails in practice to incorporate research supported teaching principles Current university instruction is still dominated by the teacher as authority The teacher downloads information from the front of the class and expects students to regurgitate it in papers and on exams The authors offer a different vision of classrooms that are characterized by the themes of meaning making collaboration equality and activity in the learning environment

ecological perspective have been used to answer issues related to cultural diversity The challenges and limitations of each theory s applications across varying client constituencies are discussed throughout What sorts of new conceptual issues for the practitioner of family services are raised in work with minority families for example or with lesbian families How does a specific theory help or not help in group specific interventions and evaluations Intended as a companion volume to the widely adopted human behavior text by Greene and Ephross Greene s new book fills the need for a wide synthetic reading of the recent literature
