The Monkey In The Rocket:

The Monkey in the Rocket Jean Bethell,1962 **Monkey in the Rocket** J. Bethell,1985-06 **The Monkey in the Rocket ... Pictures by Sergio Leone, Etc** Jean Bethell,1966 The Smoke in Our Eyes James Grady,2024-11-21 Grady's style is loose colorful challenging and fun I sometimes thought of Orwell's novel 1984 sometimes of the Dylan song Desolation Row Patrick Anderson The Washington Post Grady is a master of intrigue John Grisham Set in 1959 the year the music died The Smoke in Our Eyes is a cinematic clock ticking saga set in a small Montana town When a fatal car accident shatters ten year old Lucas's world he finds himself confronting crime and vengeance humour and heroism all against the backdrop of growing up Alongside the tightly written drama of Lucas and his family Grady author of the classic Condor series evokes a heady mood and sense of place From the Space Race and the first warnings of global climate change to the brutal racism of segregation and the hope of a new generation to move us forward The Smoke in Our Eyes is a fresh rendering of rural noir that captures both an intimate story and the volatility of mid century America **The Monkey Wars** Deborah Blum,1995-12-14 The controversy over the use of primates in research admits of no easy answers We have all benefited from the medical discoveries of primate research vaccines for polio rubella and hepatitis B are just a few But we have also learned more in recent years about how intelligent apes and monkeys really are they can speak to us with sign language they can even play video games and are as obsessed with the games as any human teenager And activists have also uncovered widespread and unnecessarily callous treatment of animals by researchers in 1982 a Silver Spring lab was charged with 17 counts of animal cruelty It is a complex issue made more difficult by the combative stance of both researchers and animal activists In The Monkey Wars Deborah Blum gives a human face to this often caustic debate and an all but human face to the subjects of the struggle the chimpanzees and monkeys themselves Blum criss crosses America to show us first hand the issues and personalities involved She offers a wide ranging informative look at animal rights activists now numbering some twelve million from the moderate Animal Welfare Institute to the highly radical Animal Liberation Front a group destructive enough to be placed on the FBI's terrorist list And she interviews a wide variety of researchers many forced to conduct their work protected by barbed wire and alarm systems men and women for whom death threats and hate mail are common She takes us to Roger Fouts's research center in Ellensburg Washington where we meet five chimpanzees trained in human sign language and we visit LEMSIP a research facility in New York State that has no barbed wire no alarms and no protesters chanting outside because its director Jan Moor Jankowski listens to activists with respect and treats his animals humanely And along the way Blum offers us insights into the many side issues involved the intense battle to win over school kids fought by both sides and the danger of transplanting animal organs into humans As it stands now Blum concludes the research community and its activist critics are like two different nations nations locked in a long bitter seemingly intractable political standoff But if you listen hard there really are people on both sides willing to accept and work within the complex middle

When they can be freely heard then we will have progressed to another place beyond this time of hostilities In The Monkey Wars Deborah Blum gives these people their voice **Laika's Window** Kurt Caswell,2018-09-18 Laika began her life as a stray dog on the streets of Moscow and died in 1957 aboard the Soviet satellite Sputnik II Initially the USSR reported that Laika the first animal to orbit the earth had survived in space for seven days providing valuable data that would make future manned space flight possible People believed that Laika died a painless death as her oxygen ran out Only in recent decades has the real story become public Laika died after only a few hours in orbit when her capsule overheated Laika s Window positions Laika as a long overdue hero for leading the way to human space exploration Kurt Caswell examines Laika s life and death and the speculation surrounding both Profiling the scientists behind Sputnik II he studies the political climate driven by the Cold War and the Space Race that expedited the satellite s development Through this intimate portrait of Laika we begin to understand what the dog experienced in the days and hours before the launch what she likely experienced during her last moments and what her flight means to history and to humanity While a few of the other space dog flights rival Laika s in endurance and technological advancements Caswell argues that Laika s flight serves as a tipping point in space exploration beyond which the dream of exploring nearby and distant planets opened into a kind of fever from which humanity has never recovered Examining the depth of human empathy what we are willing to risk and sacrifice in the name of scientific achievement and our exploration of the cosmos and how politics and marketing can influence it Laika s Window is also about our search to overcome loneliness and the role animals play in our drive to look far beyond the earth for answers

A Monkey's Tale Nathan Kravetz,2012-12-05 A Monkeys Tale by Nathan Kravetz It was a moonlit night at the rocket base For weeks the scientists had been preparing for the launching of a new rocket Reporters were standing by On this night everyone was asleep except the guard who carefully kept watch Suddenly there was a roar that grew louder and louder and the rocket began to lift off its pad Its going up shouted the guard Its blasting off yelled the scientists What Where called the reporters as they climbed out of their beds Who Why When and how Inside the capsule Sam the monkey was pulling switches and pushing buttons as he had been taught Everything was according to plan except that the rocket had not been launched by the scientists but by another monkey Sarah But this is only the beginning What happens is important to the whole world and makes a tale of a monkey that is full of fun **Animals in Space** Colin Burgess,Chris Dubbs,2007-07-05 Many readers

will doubtless be astonished to learn that animals were being fired aloft in U S and Soviet research rockets in the late 1940s In fact most people not only believe that the Russian space dog Laika was the first canine to be launched into space but also that the high profile precursory Mercury flights of chimps Ham and Enos were the only primate flights conducted by the United States In fact both countries had sent literally dozens of animals aloft for many years prior to these events and continued to do so for many years after Other latter day space nations such as France and China would also begin to use animals in their own space research Animals in Space will explain why dogs primates mice and other rodents were chosen

and tested at a time when dedicated scientists from both space nations were determined to establish the survivability of human subjects on both ballistic and orbital space flights It will also recount the way this happened the secrecy involved and the methods employed and offer an objective analysis of how the role of animals as spaceflight test subjects not only evolved but subsequently changed over the years in response to a public outcry led by animal activists It will explore the ways in which animal high altitude and space flight research impacted on space flight biomedicine and technology and how the results both successful and disappointing allowed human beings to then undertake that same hazardous journey with far greater understanding and confidence This book is intended as a detailed yet highly readable and balanced account of the history of animal space flights and the resultant application of hard won research to space technology and astrobiology It will undoubtedly become the ultimate authority on animal space flights Were They on the Moon in 1969 ? Frontier Brian Clegg,2014-08-19 Star Trek was right there is only one final frontier and that is space Human beings are natural explorers and nowhere is this frontier spirit stronger than in the United States of America It almost defines the character of the US But the Earth is running out of frontiers fast In Brian Clegg s The Final Frontier we discover the massive challenges that face explorers both human and robotic to uncover the current and future technologies that could take us out into the galaxy and take a voyage of discovery where no one has gone before but one day someone will In 2003 General Wesley Clark set the nation a challenge to produce the technology that would enable new pioneers to explore the galaxy That challenge is tough the greatest we ve ever faced But taking on the final frontier does not have to be a fantasy In a time of recession escapism is always popular and what greater escape from the everyday can there be than the chance of leaving Earth s bounds and exploring the universe With a rich popular culture heritage in science fiction movies books and TV shows this is a subject that entertains and informs in equal measure **Report** United States.
