[With a Portrait.]* Habib Ahmad, Mabel L. Ahmad, 1929 **Number to Sound** P. Gozza, 2013-03-09 Number 10 Sound The Musical Way 10 the Scientific Revolution is a collection of twelve essays by writers from the fields of musicology

and the history of science The essays show the idea of music held by European intellectuals who lived from the second half of the 15 century to the early 17th physicians e.g. Marsilio Ficino scholars of musical theory e.g. Gioseffo Zarlino Vincenzo Galilei natural philosophers e.g. Francis Bacon Isaac Beeckman Marin Mersenne astronomers and mathematicians e.g. Johannes Kepler Galileo Galilei Together with other people of the time whom the Reader will meet in the course of the book these intellectuals share an idea of music that is far removed from the way it is commonly conceived nowadays it is the idea of music as a science whose object musical sound can be quantified and demonstrated or enquired into experimentally with the methods and instruments of modern scientific enquiry In this conception music to be heard is a complex variable structure based on few simple elements e.g. musical intervals combined according to rules and criteria which vary along with the different ages However the varieties of music created by men would not exist if they were not based on certain musical models e.g. the consonances which exist in the mind of God or are hidden in the womb of Nature which man discovers and demonstrates and finally translates into the language of sounds
