**Star Trek and Sacred Ground** Jennifer E. Porter, Darcee L. McLaren, 2016-02-24 Drawing on a number of methodologies and disciplinary perspectives this book boldly goes where none has gone before by focusing on the interplay

between Star Trek religion and American culture as revealed in the four different Trek television series and the major motion pictures as well. Explored from a Trek perspective are the portrayal and treatment of religion, the religious and mythic elements, the ritual aspects of the fan following and the relationship between religion and other issues of contemporary concern. Divided into three sections, this detailed study of religion, myth and ritual in the Star Trek context extends the boundaries of the traditional categories of religious studies and explores the process of the re-creation of culture. The first section explores the ways in which religion has primarily been understood in the Star Trek franchise in relationship to science, technology, scientism and secular humanism. What do Star Trek and its creator Gene Roddenberry have to say about religion and what does this reveal about changing American perceptions about the role, value and place of religion in everyday life? Section Two examines the mythic power and appeal of Star Trek and highlights the mythic and symbolic parallels between the series story lines and themes taken from both western religious tradition and the scientific and technological components of contemporary North American Society. In the final section, contributors discuss the mythic and ritual aspects of Star Trek fandom. How have Star Trek fans found meaning and value in the television programs and how do they express that meaning in their lives? Contributors include Robert Asa, Michael Jindra, Larry Kreitzer, Jeffrey S. Lamp, Peter Linford, Ian Maher, Anne Pearson, Gregory Peterson and Jon Wagner.

**Educational Research and the Question(s) of Time** David R. Cole, Mehri Mirzaei Rafe, Gui Ying Annie Yang-Heim, 2024-06-24. This book fully explores the question(s) of time in educational research and achieves the acceleration and merging of inquiry with action to understand change and implement these findings through practice. It deals with the philosophy of education, higher education, schooling, the curriculum, time displacement, technology, the environment and policy. This book focuses on time revolution(s). It explores new ways of thinking about time that question a linear arrow in time and sets into motion an educational research agenda to extract revolutions of time. Furthermore, this book figures the dimension of time in teaching and learning by extending and deepening the engagement with time in education. For example, it analyzes the climate crisis in terms of education and how the realization that the climate is changing sits parallel and adjacent to pedagogy. The climate crisis and how to do anything about it through education is an example of how considering the dimension of time opens up education beyond quick or narrow fixes and introduces a profound synthesis for the future.
