and reveals that our boundaries for the genre are perhaps not so solid This work focuses primarily on newer kaiju works ranging from Colossal to Shin Godzilla to Godzilla vs Kong but also touches on classics such as King Kong Mighty Joe Young Godzilla Raids Again and lesser known works such as What to Do With the Dead Kaiju and Agon Like our ancestors we have collectively adopted giant monsters into our culture especially our pop culture Within the domains where giant monsters walk we experience the rigidity of our moral structures and the fleeting borders of our definitions of humanity Within the kaiju film genre rest our own assumptions about what makes a monster a monster and more importantly what makes a human a human

*Science, Entertainment and Television Documentary* Vincent Campbell, 2016-05-13 The shift from traditional documentary to factual entertainment television has been the subject of much debate and criticism particularly with regard to the representation of science New types of factual programming that combine documentary techniques with those of entertainment formats such as drama game shows and reality TV have come in for strident criticism Often featuring spectacular visual effects produced by Computer Generated Imagery these programmes blur the boundaries between mainstream science and popular beliefs Through close analysis of programmes across a range of sciences this book explores these issues to see if criticisms of such hybrid programmes as representing the rotting carcass of science TV really are valid Campbell considers if in fact when considered in relation to the principles practices and communication strategies of different sciences these shows can be seen to offer more complex and rich representations that construct sciences as objects of wonder awe and the sublime

**Dinomania** Boria Sax, 2018-10-15 From Jurassic Park to Sue the T Rex and Barney our dino love affair is as real as astonishing and as incomprehensible as the gargantuan beasts themselves At once reptilian and avian dinosaurs enable us to imagine a world far beyond the usual boundaries of time culture and physiology We envision them in diverse and contradictory ways from purple friends to toothy terrors reflecting in part our changing conceptions of ourselves Not unlike humans today dinosaurs seem at once powerful almost godly and helpless in the face of cosmic forces even more powerful than themselves In *Dinomania* Boria Sax a leading authority on human animal relations tells the story of our unlikely romance with the titanic saurians from the discovery of their enormous bones relics of an ancient world to the dinosaur theme parks of today That discovery around the start of the nineteenth century was intimately tied to our growing awareness of geological time and the dawn of the industrial era Dinosaurs vast size and power called to

mind railroads battleships and factories making them paradoxically emblems of modernity But at the same time their world was nature at its most pristine and unsullied the perfect symbol of childhood innocence and wonder Sax concludes that in our imaginations dinosaurs essentially are and always have been dragons and as we enter a new era of environmental threats in which dinos provide us a way to confront indirectly the possibility of human extinction their representation is again blending with the myth and legend from which it emerged at the start of the modern age Fun and ferocious and featuring many superb illustrations of dinosaurs from art popular culture film and advertising Dinomania is a thought provoking homage to humanity s enduring dinosaur amour

Debus,2022-06-24 During the 2010s science fiction s immortal adversaries King Kong and Godzilla representing our conflicts per Carl Sagan s dream dragons analogy made comebacks in American cinema The blockbuster Kaiju resurged onto the screen depicting these protectors of an Earth plagued by mankind s hubris and folly With Earth s future hanging in the balance their climactic 2021 staging settled a score between the two giant monsters resolving Toho s classic 1963 film King Kong vs Godzilla As formidable creatures emerging from Time s Tomb on Mother Earth metaphorical Kong and Godzilla are considered here in light of new millennial environmentalism s stark reality This book nostalgic in tone explores the meaning of Kong and Godzilla as planetary saviors titanic protectors of a theoretical living Earth Gaia defending the globe from a prehistoric plague of adversaries
