Stars Are Dark 1st Edition:

Agnes Mary Clerke and the Rise of Astrophysics M. T. Brück, 2002-05-09 Born in Ireland in the mid nineteenth century Agnes Mary Clerke achieved fame as the author of *A History of Astronomy during the Nineteenth Century* Through her quarter century career she became the leading commentator on astronomy and astrophysics in the English speaking world The biography of Agnes Clerke describes the life and work of this extraordinary woman It also chronicles the development of astronomy in the last decades of pre Einstein science and introduces many of the great figures in astronomy of that age including Huggins Lockyer Holden and Pickering their achievements and their rivalries The story follows her friendship with William and Margaret Huggins and her prolific correspondence with eminent astronomers of the time This biography will fascinate scientists and anyone who admires intellectual achievement brought about through love of learning and sheer hard work

Starlight Starbright: Are Stars Conscious? Second Edition Greg Matloff, C Bangs, 2020-05-07 The only thing we can be absolutely sure of is our own consciousness But what is consciousness Is it a property that is unique to humans or do we share it with other lifeforms Or is the philosophical doctrine of panpsychism correct are stars and the entire universe conscious in some sense Early chapters in this book examine the prehistory mythology and history of this topic Arguments are presented from the viewpoints of shamans philosophers poets quantum physicists and novelists A simple toy model of panpsychism is then presented in which a universal field of proto consciousness interacts with molecular bonds via the vacuum fluctuation pressure of the Casimir Effect It is shown how this model is in congruence with an anomaly in stellar motions called Parenago's Discontinuity Cool redder less massive stars such as the Sun apparently circle the center of the galaxy faster than their hotter bluer more massive sisters This discontinuity occurs at the point in the stellar distribution where molecules begin to appear in stellar spectra As described in the first edition of this book observations of main sequence stars out to 260 light years and giant stars out to 1 000 light years using the ESA Hipparcos space observatory support the reality and non locality of Parenago's Discontinuity Local more conventional explanations for this phenomenon are not supported by observations of other galaxies and the spiral arms of the Milky Way Since 2014 the new ESA Gaia space observatory has been obtaining kinematics and position data for 1 billion stars in our galaxy The first Gaia data release in 2016 has been used in 2018 by a Russian team to demonstrate Parenago's Discontinuity for a large stellar sample out to 500 light years from the Sun These observations support the hypothesis that anomalistic stellar motion is due to stellar volition as described by philosopher author Olaf Stapledon in his classic novel *Star Maker* as previously discussed by the author in the peer reviewed *Journal of the British Interplanetary Society* JBIS In light of the new Gaia observations and work by other researchers it is not impossible that panpsychism is emerging from the realm of philosophy as a new subdivision of observational astronomy Simple models of universal proto consciousness may be subject to inductive tests using current and future space observatories A special feature of this book is the chapter frontispiece art by C Bangs

The Darkness Of 10,000 Stars John J. Ensminger, Ph. D, 2009-02-11 **TITLE** THE DARKNESS OF 10 000 STARS **AUTHOR** JOHN J ENSMINGER PhD Meet Arthur Banks a wise gentleman nearly 80 retired Navy chaplain who has been a friend to George Farmer and his sons all his life However after George passed away Arthur experienced a long absence from the Farmer family and he is stunned when suddenly he receives a phone call from Nick Farmer George s youngest son and his godson Although Nick has called primarily to say hello to his old friend he expressed to Arthur that he s having a serious health problem and that he his wife and children now reside up on the coast highway in a small town called Sinnerville Nick is coming down to Frisco for some tests the following week and he may be able to stop and see Arthur Although Arthur was gladly anticipating Nick s visit nothing ever came of it Therefore Arthur telephones Nick to plan a trip to Sinnerville to meet his family and visit Nick about his illness Arthur makes the 5 1 2 trip to Sinnerville and learns that everything appears to be fine with Nick and his family Nick s problem seems to stem from something terrible going on at the Post Office where he works but Arthur feels sure things will all settle down and work out He promises his constant support and prayers whatever happens However a few days later while Arthur has been home he receives another sudden call this time from Nick s wife Darlene whom he has just met She wants Arthur to return ASAP as Nick is reportedly acting suicidal With tremendous concern Arthur advises Darlene to remove all the weapons from the property if she can do so safely and he promises to return as soon as he can work out his

travel plans When he does return to Sinnerville Nick's health had visibly declined he is in a dark confused mood Nick attempts to explain what's been going on at work but it all seems quite unbelievable However Darlene agrees that it is exactly as her husband has said Therefore Arthur plans to look into the matter on their behalf if they'll allow it This is a story of friendship hope and courage as Nick and Darlene's fates unravel before our eyes Arthur learns something about evil from the small town of Sinnerville and its people but in spite of them he carries on to act courageously to try to help and later to try to locate and rescue his lifelong friend and his family You may wish you had a friend like Arthur Banks who is persistent to the end You may wish you had his courage and his grit in difficult times A Most Improbable Story Steven J.
