The Starship Diaries Dallas Kachan, 2004 **The AOPA Pilot** , 2005 *Star Trek* Duncan Barrett, Michèle

Barrett, 2016-08-05 In a world shrunk by modern transport and communication Star Trek has maintained the values of western maritime exploration through the discovery of strange new worlds in space Throughout its fifty year history the starry sea has provided a familiar backdrop to an ongoing interrogation of what it means to be human This book charts the developing Star Trek story from the 1960s through to the present day Although the core values and progressive politics of the series earliest episodes have remained at the heart of Star Trek throughout half a century in other ways the story it tells has shifted with the times While The Original Series and The Next Generation showed a faith in science and rationalism and in a benign liberal leadership with Deep Space Nine and Voyager that modern order began to decline as religion mental illness and fragmented identities took hold Now fully revised and updated to include the prequel series Enterprise and the current reboot film series this new second edition of Star Trek The Human Frontier published to coincide with Star Trek's golden jubilee celebrations addresses these issues in a range of cultural contexts and draws together an unusual combination of expertise Written to appeal to both the true Trekker and those who don't know Star Trek from Star Wars the book explores and explains the ideas and ideals behind a remarkable cultural phenomenon Gold Digger #202 Fred Perry, Peegi creates

AI model personifications of Reality and Physics two gals who at first encourage Gina who is surprised at their appearance but delighted at their support But when Gina starts to feel herself they turn into sniggering trolling hecklers who don't cut her an inch of slack Gina quickly decides she's better off deleting these two helpful AI personas but she can't find their exact location in her core computer's memory *The Teaching of Drama in the Primary School* Brian George

Seed of Light Edmund Cooper, 2012-12-14 TEN MEN AND WOMEN ESCAPED IN THE STARSHIP THE ONLY HOME THEY WOULD KNOW FOR GENERATIONS THE SEED FROM WHICH THEY WOULD BUILD A NEW RACE The Solarian was a hundred metres high and at its broadest point twenty metres in diameter It was designed to carry an initial crew of ten people five men and five women with provisions for subsequent children Yet in that vast hull every cubic metre of space was indispensable for the ship was a self contained world required to support human life independently for centuries No member of the crew male or female could regard themselves as a separate entity an individual personality But each person was a part of a total life unit a dedicated nucleus that might one day expand into a tribe that might phoenixlike bring forth a new human race

If You Like Metallica... Mike McPadden, 2012-05-01 If You Like In hard rock history there is the time before Metallica and there is everything that has come since metal punk industrial grunge alternative all of it absorbed transformed and reinvented by the band that for decades has ruled as both the Beatles and the Stones of heavy music From garage rock

to the avant garde indie pop to hardcore punk and of course all shades of metal If You Like Metallica illuminates the sounds and styles that influenced and have been influenced by this band in addition to nonmusical elements such movies books and cultural iconoclasts Just as Metallica expanded heavy metal to new meanings and new possibilities If You Like Metallica expands being a fan of the band to an education and a treasure hunt that put as bluntly as a devil fingered salute to the face rocks

City of Angels Christa Wolf,2024-03-26 The stunning final novel from East Germany's most acclaimed writer Three years after the fall of the Berlin Wall the writer Christa Wolf was granted access to her newly declassified Stasi files Known for her defiance and outspokenness Wolf was not especially surprised to discover forty two volumes of documents produced by the East German secret police But what was surprising was a thin green folder whose contents told an unfamiliar and disturbing story in the early 1960s Wolf herself had been an informant for the Communist government And yet thirty years on she had absolutely no recollection of it Wolf's extraordinary autobiographical final novel is an account of what it was like to reckon with such a shocking discovery Based on the year she spent in Los Angeles after these explosive revelations *City of Angels* is at once a powerful examination of memory and a surprisingly funny and touching exploration of L A a city strikingly different from any Wolf had ever visited Even as she reflects on the burdens of twentieth century history Wolf describes the pleasures of driving a Geo Metro down Wilshire Boulevard and watching episodes of Star Trek late at night Rich with philosophical insights personal revelations and vivid descriptions of a diverse city and its citizens *City of Angels* is a profoundly humane and disarmingly honest novel and a powerful conclusion to a remarkable career in letters *Brian Aldiss*

science fiction writing allows investigation of philosophical questions about immortality without the constraints of academic philosophy He reveals how fantasy accounts of issues such as resurrection disembodied survival reincarnation and devices or drugs for preserving life can be used as an important resource for philosophical inquiry and examines how a society of immortals might function through a reading of the vampire myth How to Live Forever is a compelling study which introduces students and professional philosophers to the possibilities of using science fiction in their work It includes extensive suggestions for further reading both fictional and philosophical and examines the work of such major science fiction authors as Arthur C Clarke Frank Herbert Larry Niven William Gibson and Colin Wilson Hell's Cartographers Brian Aldiss, Harry Harrison, 2018-06-13 Six bestselling authors provide lively personal histories that provide fascinating insights into the creative process and offer inspiration for aspiring wordsmiths Includes essays by Robert Silverberg Alfred Bester Harry Harrison Damon Knight Frederik Pohl and Brian W Aldiss **Star Ark** Rachel Armstrong, 2016-11-13 As space ventures have become more numerous leading scientists and theorists have offered ways of building a living habitat in a hostile environment taking an ecosystems view of space colonization The contributors to this volume take a radical multi disciplinary view of the challenge of human space colonization through the ongoing project Persephone This book fundamentally challenges prevalent ideas about sustainability and proposes a new approach to resource austerity and conservation and providing truly sustainable approaches that are life promoting Readers will learn the details of the plans for Persephone a real project that is part of the company Icarus Interstellar's plans for the design and engineering of a living interior on a worldship to be constructed in Earth's orbit within 100 years Although the timeframe itself is only an estimate since it is contingent on many significant developments including funding and technological advances the industry consensus is that within 100 years we will see manned space exploration beyond our solar system This notion is shared by organizations such as the Initiative for Interstellar Studies and the DARPA funded 100 year starship project This book specifically develops the principles for the construction of a living habitat within a worldship a multi generational starship that contains its own world that supports colonists as it travels across great distances between stars at a speed much slower than light Far from being a sterile industrial setup such as the ISS or even being a bucolic suburbia as proposed by Gerard O'Neill in the 1970s this worldship will provide the pre conditions for sustaining life beyond Earth's environment which may also lead to the evolution of non terrestrial ecologies Drawing on the principles of ecopoiesis and insights offered by the Biosphere 2 experiment that demonstrated what we have to learn about ecosystem construction this book proposes first designing the soils of such a space It should then be possible to set up the conditions that a first generation of colonists may experience in leaving our solar system to find new worlds to settle perhaps in spreading life throughout the universe Although the book takes a unique view of ecology and sustainability within the setting of a traveling starship it is equally concerned with the human experience on artificial worlds Chapters come from a range of multi disciplinary thinkers who shed light on the brave new future ahead
