Start Seeing Diversity The Basic Guide To An Antibias Curriculum:

Start Seeing Diversity Ellen Wolpert, 2005-06-13 Start Seeing Diversity helps teachers recognize and reduce bias in young children by illustrating one community's effort to create a responsive child care program. Developed by teachers at Washington Beech Community Preschool in Boston, this training handbook provides a framework for understanding bias among preschool children reorganized for stand-alone use as a student text. Nine detailed chapters treat six areas of bias: gender, age, sexual orientation, race, and ethnicity, economic class, and physical abilities, as well as the goals and guiding assumptions of anti-bias curriculum. Accompanying discussion questions encourage readers to examine their own memories and experiences. Perfect for pre-service and in-service teacher training, this helpful guide includes information-rich appendices containing Guidelines for challenging oppression and responding to incidents involving bias, A checklist for creating and assessing anti-bias environments, A guide to analyzing children's books, Directions for making photograph games like the ones used at Washington Beech. The book also includes sample scenarios, details for classroom implementation, suggested resources, and guidelines for group leaders. Ellen Wolpert is the founding director of the Washington Beech Community Preschool in Boston. Ms. Wolpert currently works for Education Development Center Inc. in Newton, Massachusetts.

Start Seeing Diversity Ellen Wolpert, 1999 Covers the anti-bias curriculum used at the Washington Beech Community Preschool. Part 1 gives a summary of the 4 goals of an anti-bias approach and 8 underlying assumptions. Part 2 contains individual sections that address 6 specific areas of bias: age, gender, sexual orientation, economic class, physical abilities, and physical characteristics. Each section provides several concrete examples of the ways that bias comes up in a classroom, as well as strategies to support children's development of strong self and group identities, their ability to recognize and think critically about bias, and their capacity to stand up for themselves and others.

clinicians recognize that denying or ignoring grief issues in children leaves them feeling alone and that acknowledging loss is crucial part of a child's healthy development. Really dealing with loss in productive ways however is sometimes easier said than done. For decades *Life and Loss* has been the book clinicians have relied on for a full and nuanced presentation of the many issues with which grieving children grapple as well as an honest exploration of the interrelationship between unresolved grief, educational success and responsible citizenry. The third edition of *Life and Loss* brings this exploration firmly into the twenty first century and makes a convincing case that children's grief is no longer restricted only to loss identified children. Children's grief is now endemic, it is global. *Life and Loss* is not just the book clinicians need to understand grief in the twenty first century, it's the book they need to work with it in constructive ways.
