Books Rose Army,1994-04 Research Informing Practice - Practice Informing Research David Schwarzer,Mary Petrón,Christopher Luke,2011-04-01 Research Informing Practice Practice Informing Research Innovative Teaching Methodologies for World Language Educators is an edited volume that focuses on innovative nontraditional methods of teaching and learning world languages Using teacher research projects each author in the volume guides readers through their own personal journey and exploration of teaching methods novelty risk taking and reflection Chapters include guiding questions vignettes and thick descriptions of classroom based research in an assortment of instructional settings Theoretical issues and an array of practical applications are presented as well as additional research opportunities and guidelines for implementation in a variety of teaching and learning venues While not professing to be a panacea for world language learning this book provides various lines of theory research and practice as they interact with each other through teacher research narratives As a well known African proverb asserts It takes a village to raise a child Similarly it takes a village to develop a master teacher and it takes a community to create an exceptional classroom Throughout this volume authors share their voices experiences and expertise as a means of strengthening the village They then invite readers to embark on their own methodological journeys The text thus serves as a stimulus for further discussion and pedagogical development in world language settings Teachers and researchers are challenged to think critically and reflectively about world language education encouraged to design innovative methods approaches and techniques for their world language classes and ultimately asked to share their findings with students parents peers communities and the village The Persistence of Entrepreneurship Myths Simon Bridge,2021-12-30 Triggered largely by claims that small businesses were the main source of new jobs an explosion of interest in enterprise entrepreneurs and small business has led to the establishment of a conventional wisdom about enterprise Mistaken theories can become influential and examining the conventional enterprise wisdom indicates that much of it is questionable If that is the case a reassessment is needed While wilful blindness and continuing to do more of the same is a natural response it will not lead to improvements in knowledge A new paradigm requires a step change in thinking which is not easy to initiate Nevertheless accepting the evidence for the errors in current understanding and practice is a necessary first step if enterprise and its benefits are to be better understood and promoted This book examines the conventional wisdom around enterprise entrepreneurs and small businesses and illustrates not only

why and how this could have evolved but also why it could be based on a set of mistaken assumptions Correcting the foundational knowledge on which enterprise and policy and practice rely and finding a new paradigm will result in better teaching and more effective policy It will therefore be of interest to researchers academics students and policy makers in the fields of enterprise and entrepreneurship **Writing with Research** Kristen B. Neuschel, Ann Marie Rasmussen, 2025-05-20
