Science ,1928 **New Thinking in Complexity for the Social Sciences and Humanities** Ton Jörg,2011-08-09 The underlying idea and motive for the book is that the notion of complexity may humanize the social sciences may conceive the complex human being as more human and turn reality as assumed in our doing social science into a more complex that is a richer reality for all The main focus of this book is on new thinking in complexity with complexity to be taken as derived from the Latin word *complexus* that which is interwoven The trans disciplinary approach advocated here will be trans disciplinary in two ways firstly by going beyond the separate disciplines within the fields of both natural sciences and social sciences and secondly by going beyond the separate cultures of the natural sciences and of the social sciences and humanities

Matthews,2025-04-09 Doing Good Social Science takes readers on a personal and thought provoking journey and empowers readers to become unshakeable free thinking scholars Drawing from nearly two decades of experience in research and mentorship this book shares insights gained from creating immersive moments to challenge conventional methodology and social theory In doing so it integrates ideas from classical and contemporary scholarship across various disciplines bringing them to life through engaging field notes interviews and often humorous examples The book outlines how to cultivate disciplined and systematic scholarship on complex topics while critiquing the wonky practices that often pervade modern academia Part One advocates for a more scientific approach to social science offering guiding principles for scholars striving to understand social life Part

Two deepens and complicates these arguments by examining the philosophical foundations of social science focusing specifically on the in between aspects of the human condition and our social nature The writing and thinking in the book are distinctive passionate and brave This book is a compelling read for advanced students early career researchers and any academic seeking to develop a more liberated inventive approach to methods

Naturalism and Social Science David Thomas, 1980-01-24 This 1979 text addresses the ways in which the dominant theories in large areas of Western social science have been subject to strong criticisms particularly of their supposed philosophical deficiencies In the philosophy of science this resulted in empiricist views being replaced by an emphasis on the potential obstinacy of theory in the face of the empirical world After introducing this contemporary philosophy of science Dr Thomas uses it to argue that social study can both retain the natural scientific commitment to the constraint of the external world and assimilate the sorts of philosophical criticisms that were made of the old social scientific theories In particular he shows that social study understood in terms of the new philosophy of science can give an account of the former's distinctive concerns with issues of the meaning and value of social life Dr Thomas supports his abstract arguments by detailed case studies
