Tunisia's GDP totalled TD84 3bn 36 2bn in 2015 expanding at a rate of 0.8% down from growth of 2.3% the year before. The fall was due to a variety of external factors including two terrorist incidents that negatively affected the tourism sector in particular and shook business confidence more generally. However, growth picked up somewhat in 2016 standing at 1% 1.4% and 1.3% in the first, second and third quarters of the year respectively and is expected to maintain this upward trend in 2017 supported by greater export competitiveness. Moves to bolster the economy through reforms such as the new investment law and plans to tackle wider structural issues are likely to help to raise growth to higher levels than those witnessed in recent years as should the improvement in security since the 2015 attacks though the extent of this will depend in part on whether or not the economy of the country's main export destination and tourism source market, the eurozone, can emerge from its own recent slowdown.

As Farleigh's trading results started to attract international attention, he was frequently asked to give presentations of his ideas to other professional traders. From the feedback during these sessions, he realised that others were interested in an approach to investing which was based on first principles. Finding that anecdotes were the best way to make a point and that ideas could be summarised into numbered strategies allowed him to show clearly how the methodology worked. Years later, Farleigh is still using the same approach and has found that amateurs as well as professionals are keen to find out how markets work and how to improve their investment performance. This book contains those secrets. Some of the beliefs that he incorporates into his strategies include: Markets tend to under react not overreact. Big obvious ideas offer great opportunities. It is safe to invest with a consensus view. Contrarian trading is usually irrational. It is best to enter and exit the share market at the right times instead of always staying invested. Price trends are well known but under utilised. Chartist are just astrologers. Investment and trading are increasingly similar. Anyone who was able to retire at the age of 34, move to Monte Carlo and become a private investor must have made some smart investment decisions. Richard Farleigh did just that and he's sharing his secrets in this book. Money
