Feminist Surveillance Studies Rachel E. Dubrofsky, Shoshana Amielle Magnet, 2015-05-15 Questions of gender race class and sexuality have largely been left unexamined in surveillance studies The contributors to this field defining collection take up these questions and in so doing provide new directions for analyzing surveillance They use feminist theory to expose the ways in which surveillance practices and technologies are tied to systemic forms of discrimination that serve to normalize whiteness able bodiedness capitalism and heterosexuality The essays discuss the implications of among others patriarchal surveillance in colonial North America surveillance aimed at curbing the trafficking of women and sex work women presented as having agency in the creation of the images that display their bodies via social media full body airport scanners and mainstream news media discussion of honor killings in Canada and the concomitant surveillance of Muslim bodies Rather than rehashing arguments as to whether or not surveillance keeps the state safe the contributors investigate what constitutes surveillance who is scrutinized why and at what cost The work fills a gap in feminist scholarship and shows that

gender race class and sexuality should be central to any study of surveillance Contributors Seantel Ana s Mark Andrejevic Paisley Currah Sayantani DasGupta Shamita Das Dasgupta Rachel E Dubrofsky Rachel Hall Lisa Jean Moore Yasmin Jiwani Ummni Khan Shoshana Amielle Magnet Kelli Moore Lisa Nakamura Dorothy Roberts Andrea Smith Kevin Walby Megan M Wood Laura Hyun Yi Kang *Neural Information Processing* Long Cheng,Andrew Chi Sing Leung,Seiichi Ozawa,2018-12-03 The seven volume set of LNCS 11301 11307 constitutes the proceedings of the 25th International Conference on Neural Information Processing ICONIP 2018 held in Siem Reap Cambodia in December 2018 The 401 full papers presented were carefully reviewed and selected from 575 submissions The papers address the emerging topics of theoretical research empirical studies and applications of neural information processing techniques across different domains The 4th volume LNCS 11304 is organized in topical sections on feature selection clustering classification and detection *On the Other Side of Pain Is Your Victory* Francine McClain,2024-10-04 Experiencing trauma and abuse from her own father and not knowing what it is like to be raised by a mother there are not enough words to describe the emotional and physical abuse that she and her brothers had to endure for years Join Francine McClain while she takes you through a very traumatic time in her life that was meant to destroy her Find out just how the Lord took what the enemy meant for evil and turned it around in her favor Francine McClain shares with us just how the Lord was able to bring her through the fire and help her walk into the unique destiny that God had ordained for her life **The Pursuit of Attention** Charles Derber,2000-06-15 Enough about me goes the old saying what about you What do you think about me Hence the pursuit of attention is alive and well Even the Oxford English Dictionary reveals a modern coinage to reflect the chase in our technological age ego surfing searching the Internet for occurrences of your own name What is the cause of this obsessive need for others recognition This useful and popular volume now in a second edition that features major new introductory and concluding essays entertainingly ponders this question Derber argues that there is a general lack of social support in today s America one which causes people to vie hungrily for attention and he shows how individuals will often employ numerous techniques to turn the course of a conversation towards themselves Illustrating this conversational narcissism with sample dialogues that will seem disturbingly familiar to all readers this book analyzes the pursuit of attention in conversation as well as in politics and celebrity culture and demonstrates the ultimate importance of gender class and racial differences in competing for attention Derber shows how changes in the economy and culture such as the advent of the Internet have intensified the rampant individualism and egotism of today And finally in a new afterword he focuses on solutions how to restructure the economy and culture to humanize ourselves and increase the capacity for community empathy and attention giving
