International Handbook of Comparative Education Robert Cowen,Andreas M. Kazamias,2009-08-22 A big project like this Handbook means that you incur debts and not only to your authors and your publisher As editors we along with our colleague Elaine Unterhalter who edited the section on postcolonialism would like to thank most warmly those authors who delivered on time and who did not fuss but just got on and did a r rate job We would also like to thank all authors who did deliver which was almost everyone we asked We know that some of our authors worked in very dif cult private circumstances as they were nishing their chapters and we hope the publication of the Volumes will later be for them a happy reminder of dif culties and disasters overcome The only sad theme is that some very close colleagues with whom we were wo ing and for whom we had the greatest respect and liking became very ill and died while the volumes were being prepared We decided to ask for copyright permissions to publish something of theirs These permissions were graciously given by two major journals and with the agreement also of our publishers Springer Rolland Paulston and Terry McLaughlin have examples of their writing in this Handbook *The Education of Nations. A Comparison in Historical Perspective ... Revised Edition* Heinrich Gottlob Robert ULICH,1967 Education and Society in Comparative Context Eija Kimonen,2015-12-17 What was the interrelationship between education and society during the twentieth century in the United States and India What is the essence of the historical development of educational policies and social systems in these two countries What philosophical views and developmental courses underlie their outdoor oriented education What are their aims of outdoor oriented education What procedures are connected with their outdoor oriented education These questions are examined in this unique volume This book is divided into three parts The first part creates a context for the comparison of the issues concerning education and society The central point of departure used here regards education as being closely related to the totality of culture and human activity The dialectic process between education and society is realized differently in accordance with the value objectives that provide the background for different societies This comparative educational study uses a historico hermeneutical approach The second part analyzes the social systems and educational policies of the United States and India following their developmental trends and patterns The nature of the relationship between education and society for each country is further brought into focus when it is interpreted from the perspective of the philosophical views pedagogical aims and procedures of twentieth century outdoor oriented education The case studies provide an interesting insight into how changes in educational policy have been reflected in the every day pedagogical procedures used in schools in the United States and India The third part is an analysis and comparison of the phenomena previously presented that are related to

education and society through the lenses suggested by sociological theories It compares the dimensions of the interrelationship between education and society from the standpoint of outdoor oriented education in the two countries during the twentieth century This thought provoking volume is intended for anybody interested in the interplay between education and society in all its complexity It offers a fascinating journey into the past and present of the issues that have defined the development of education and society in the United States and India *Harvard Educational Review* Howard Eugene Wilson,1967 The Harvard Educational Review is a journal of opinion and research in the field of education Articles are selected edited and published by an editorial board of graduate students at Harvard University The editorial policy does not reflect an official position of the Faculty of Education or any other Harvard faculty Volume 81 Number 2 Summer 2011
