Existence and Enlightenment in the Lankāvatāra-Sūtra Florin Giripescu Sutton,1991-01-01 This book offers a systematic analysis of one of the most important concepts characterizing the Yog c ra School of Buddhism the last creative stage of Indian Buddhism as outlined and explained in one of its most authoritative and influential texts La k vat ra S tra Compiled in the second half of the fourth century A D this sutra not only represents a comprehensive synthesis of both early and late religio philosophical ideas crucial to the understanding of Buddhism in India but it also provides an insight into the very early roots of the Japanese Zen Buddhism in the heart of the South Asian esotericism The first part of the book outlines the three fold nature of Being as

conceptualized in Buddhist metaphysics The author uses an interpretive framework borrowed from the existentialist philosophy of Heidegger in order to separate the transcendental Essence of Being from its Temporal manifestation as Self and from its Spatial or Cosmic dimension The second part clarifies the Buddhist approach to knowledge in its religious transcendental sense and it shows that the Buddhists were actually first in making use of dialectical reasoning for the purpose of transcending the contradictory dualities imbedded in the common ways of perceiving thinking and arguing about reality
