The Los Angeles River Its Life Death And Possible Rebirth:

The Los Angeles River Blake Gumprecht, 2001-04-30 Winner of the J B Jackson Prize from the Association of American Geographers Three centuries ago the Los Angeles River meandered through marshes and forests of willow and sycamore Trout spawned in its waters and grizzly bears roamed its shores The bountiful environment the river helped create supported one of the largest concentrations of Indians in North America Today the river is made almost entirely of concrete Chain link fence and barbed wire line its course Shopping carts and trash litter its channel Little water flows in the river most of the year and nearly all that does is treated sewage and oily street runoff On much of its course the river looks more like a deserted freeway than a river The river's contemporary image belies its former character and its importance to the development of Southern California Los Angeles would not exist were it not for the river and the river was crucial to its growth Recognizing its past and future potential a potent movement has developed to revitalize its course The Los Angeles River offers the first comprehensive account of a river that helped give birth to one of the world's great cities significantly shaped its history and promises to play a key role in its future

Down by the Los Angeles River, 2010-11 In the last decade millions of dollars have been spent on restoring and revitalizing the Los Angeles River and its surroundings Dozens of parks miles of bike trails public art installations and hundreds of trees and plants follow the river as it winds 51 miles through more than 100 communities Down by the Los Angeles River is the first on the ground guide to checking out sites new and old and getting to know the historic river that runs through greater L A The book includes striking original illustrations as well as maps Twenty seven walks and twelve bike rides along the Los Angeles and its tributaries each with directions to the starting point and descriptions of natural historic and artistic features along the way The river paths are already popular for walkers and joggers bicyclists dog walkers historians and bird watchers a readymade audience for this one of a kind book

Los Angeles River Ted Elrick, 2007 For centuries the Los Angeles River was unpredictable prone to flooding a raging torrent during rare Southern California rains and just a trickle and marshlands the rest of the year To tame it the U S Army Corps of Engineers walled in the river after the disastrous 1938 flood Decades later roadside signs that proclaimed Los Angeles River prodded the question How can this cement drain strewn with trash and abandoned refrigerators be considered a river Abused through the 20th century the L A River is in the midst of a comeback thanks to the Friends of the Los Angeles River FoLAR and local governments The realization that this arroyo has been as crucial to the development and growth of the city as the climate is again alive in the community The vintage photographs for this historic and redemptive look at one of the great natural features of Los Angeles County were collected from private and public archives From publisher description
