waves and the currents in the nearshore to the response of the beach via sand transport resulting in a changing coastal
morphology Of these many processes this book focuses only on those which directly relate the generation of coastal erosion
Some chapters deal exclusively with the physical processes while others provide examples of erosion problems although most
of the chapter topics have clear implications for issues of coastal zone management these issues are not belaboured as
several other books are already available in this area The objective is to provide state of the art presentation of the science of
