## **Standpoints And Differences Essays In The Practice Of Feminist Psychology:**

*Standpoints and Differences* Karen Henwood, Christine Griffin, Ann Phoenix, 1998-09-14 This volume investigates a key area of theoretical interest within contemporary feminist and poststructuralist theory paying particular attention to feminist psychology Recognizing that feminist researchers have a long standing commitment to conducting research from feminist standpoints the contributors consider the tensions between this and the poststructuralist argument that research and emancipatory politics can flow from personal and political differences The volume considers questions and developments on giving voice and explores arguments and theoretical positions concerning power and subjectivity paying attention to how these inform research practice

**Perfectly Prep** Sarah A. Chase, 2008-03-20 Living in a senior boys dorm at a co ed school Sarah Chase was able to witness the inner workings of student culture and power of individual agency She examines the price of privilege and uncovers how student culture reflects and perpetuates society and institutional power structures and gender ideologies

*The Hidden Life of Girls* Majorie Harness Goodwin, 2008-04-15 Winner of the Best Book of 2008 from The International Gender and Language Association In this ground breaking ethnography of girls on a playground Goodwin offers a window into their complex social worlds Combats stereotypes that have dominated theories on female moral development by challenging the notion that girls are inherently supportive of each other Examines the stances that girls on a playground in a multicultural school setting assume and shows how they position themselves in their peer groups Documents the language practices and degradation rituals used to sanction friends and to bully others Part of the Blackwell Studies in Discourse and Culture Series

**The Single Woman** Jill Reynolds, 2013-03-01 The increase in numbers of single people has been described as one of the greatest social phenomena of western society Most women will spend periods of their lives alone without a committed partner relationship Yet there is still a degree of social stigma attached to this status Single women are a crucial group for study in relation to perceived changes in family life and relationships This book provides a new understanding of what is often taken for granted female single identity In an examination of extracts from her interviews with women aged 30 to 60 years and living alone Jill Reynolds explores how women deal with this potentially stigmatized identity She focuses on identity and self representation through consideration of discourse and the conversational moves made by the participants Her analysis highlights that the culturally available and familiar resources for understanding singleness are highly polarized Single women weave their way through the extreme contrasts of a denigrated or an empowered identity Thus while most participants give very positive accounts they also pay attention to widespread social expectations that success in life involves a long term committed relationship This book makes an important contribution to the understanding of the lives of single women and represents a challenge to the considerable literature on gender and family life which has inadequately theorized singleness It will be of great interest to academics and students in social psychology sociology social work and social policy It will also be of particular interest to students of gender studies qualitative research narrative studies

conversation analysis and discourse analysis      Successful Qualitative Research Virginia Braun, Victoria Clarke, 2013-03-22 Shortlisted for the BPS Book Award 2014 in the Textbook Category Winner of the 2014 Distinguished Publication Award DPA from the Association for Women in Psychology AWP Successful Qualitative Research A Practical Guide for Beginners is an accessible practical textbook It sidesteps detailed theoretical discussion in favor of providing a comprehensive overview of strategic tips and skills for starting and completing successful qualitative research Uniquely the authors provide a patterns framework to qualitative data analysis in this book also known as thematic analysis The authors walk students through a basic thematic approach and compare and contrast this with other approaches This discussion of commonalities explaining why and when each method should be used and in the context of looking at patterns will provide students with complete confidence for their qualitative research journey This textbook will be an essential textbook for undergraduates and postgraduates taking a course in qualitative research or using qualitative approaches in a research project      **Researching 'Race' and Ethnicity** Yasmin Gunaratnam, 2003-08-07 Gunaratnam's framework is rich in its examination and synthesis of approaches to the study of race the reward for the reader who does pick up the book is that the author deftly articulates the complicated view of research on race first from the quantitative perspective and then skilfully moves the reader to issues of race in qualitative research Studies in Ethnicity and Nationalism This is a welcome book for those engaged in policy and empirical work with an active research agenda there is a level of theoretical sophistication in the text which is often missing from texts concerned with methods in this area Race Relations Abstracts The particular value of this book to readers lies in the discussion of race ethnicity and research issues within a political and social context The author states her intention to explore some of the theoretical and practical dilemmas of researching race and ethnicity This is without question achieved I recommend it as essential reading for those concerned with increasing their awareness of issues relating to race ethnicity and research practice Nurse Researcher This is a thought provoking and challenging book which demonstrated the fractured and fluid nature of difference and power in the research process Importantly it offers a guide to the ways in which research can be effectively and productively used in challenging the status quo Diversity in Health and Social Care Researching Race and Ethnicity provides an innovative discussion of the methodological epistemological and ethical challenges of doing qualitative research that is informed by questions of race ethnicity and social difference By identifying and challenging categorical thinking and many longstanding assumptions about the meanings of race and ethnicity the author gets to the heart of many of the everyday dilemmas and difficulties that researchers confront in the field but are rarely theorised or openly discussed Yasmin Gunaratnam's insistence that race and ethnicity are a significant part of all qualitative research and are not the specialist concerns of those whose work is explicitly focussed upon race provokes a radical rethinking of current methodological debates How do racial and ethnic categories inform our approaches to research How does the racialised identity of the researcher and the research participants affect the research interaction and the knowledge that we produce

What are the assumptions that are made about racialised subjectivity and inter subjectivity How can we make sense of accounts in which race and ethnicity are silent or are non manifest How can we work ethically across difference In examining these and other questions the wide ranging discussions in the book are animated by examples drawn from the author s ethnographic research with white and minoritized research participants Through these examples readers will be able to engage with some of the complexities of research relationships power relations and ethical concerns about engagement disconnection and complicity in research The attention that the book gives to the excluded experiences of minoritized researchers will be of particular value to many readers Researching Race and Ethnicity is essential reading for students and academics in the social sciences

**Considering Counter-Narratives** Michael Bamberg, Molly Andrews, 2004-11-30 Counter narratives only make sense in relation to something else that which they are countering The very name identifies it as a positional category in tension with another category But what is dominant and what is resistant are not of course static questions but rather are forever shifting placements The discussion of counter narratives is ultimately a consideration of multiple layers of positioning The fluidity of these relational categories is what lies at the center of the chapters and commentaries collected in this book The book comprises six target chapters by leading scholars in the field Twenty two commentators discuss these chapters from a number of diverse vantage points followed by responses from the six original authors A final chapter by the editor of the book series concludes the book

*Examining Mental Health through Social Constructionism* Michelle O'Reilly, Jessica Nina Lester, 2017-09-26 This book explores social constructionism and the language of mental distress Mental health research has traditionally been dominated by genetic and biomedical explanations that provide only partial explanations However process research that utilises qualitative methods has grown in popularity Situated within this new strand of research the authors examine and critically assess some of the different contributions that social constructionism has made to the study of mental distress and to how those diagnosed are conceptualized and labeled This will be an invaluable introduction and source of practical strategies for academics researchers and students as well as clinical practitioners mental health professionals and others working with mental health such as educationalists and social workers

*Gender and Choice in Education and Occupation* John Radford, 2002-09-26 Despite many years of equality of choice boys and girls continue to differ in both the subjects they study at school and later in the careers they decide to pursue In this collection of papers by leading researchers from academic and practitioner backgrounds the current evidence from a range of fields is reviewed Drawing on both their own original research and that of others the contributors consider topics as diverse as subject choice in secondary school differences in brain functions between the sexes the comparison of men and women in management and recruiting women to science and technology

International Human Rights Law and Crimes Against Women in Turkey Ayşe Güneş, 2020-12-20 This book evaluates the effectiveness of current international human rights law and in particular the recent Istanbul Convention in eradicating so called honour killings in Turkey So called

honour killings have become an issue of concern for the international community In Turkey in particular the practice still exists despite the adoption of the relevant human rights instruments The book argues that the improvement of the status of women in Turkey in accordance with gender equality as well as the application of the principle of state due diligence both requirements of the Istanbul Convention and international human rights law are fundamental means towards eradicating the killing of women in the name of honour Using feminist approaches in particular the intersectionality approach the study looks at the application of such standards as well as the current obstacles Through such a lens the study discusses the strengths and weaknesses of the Turkish Constitution Turkish Civil Code Turkish Penal Code and Law to Protect Family and Prevent Violence Against Women and questions the judicial approach to the implementation of the women s right to life It identifies the lacunae in the Turkish legislation that allow inadequate legal protection for women and the inconsistency of the judicial approach to the definition of the so called honour killings in the judgements The study then recommends some concrete amendments to the relevant legal provisions in order to better reflect the international framework and the feminist approaches The book will be a valuable resource for academics researchers and policy makers in the areas of international human rights law and feminist legal theory      *Narratives of Identity and Place* Stephanie Taylor, 2009-10-16 Changes of residence are common in contemporary Western societies Traditional connections to birthplaces home towns and countries are broken as people relocate and migrate yet where they live remains significant to people s identity and stories of who they are This book investigates the continuing importance of place for women s identities employing a theoretical and empirical approach based on previous work in narrative and discursive psychology Through an analysis of women s talk the book examines how commonsense meanings shape and limit people s identity work to establish a connection to place It argues that talk about place and especially place of residence enables a complex positioning of self and others in which identities of gender class and national identity intersect It shows how a speaker s multiple interpretations of where she lives remain central to her life narrative and to her fragile and idealized definition of home as the place in which she may position herself positively *Narratives of Identity and Place* presents a unique and valuable integration of the popular methods of narrative and discourse analysis compellingly demonstrating the value of these approaches for research on identity      *Seduction* Rachel O'Neill, 2018-07-04 Within the so called seduction community the ability to meet and attract women is understood as a skill which heterosexual men can cultivate through practical training and personal development Though it has been an object of media speculation and frequent sensationalism for over a decade this cultural formation remains poorly understood In the first book length study of the industry Rachel O'Neill takes us into the world of seduction seminars training events instructional guidebooks and video tutorials Pushing past established understandings of pickup artists as pathetic pathological or perverse she examines what makes seduction so compelling for those drawn to participate in this sphere *Seduction* vividly portrays how the twin rationalities of neoliberalism and postfeminism are reorganising contemporary

intimate life as labour intensive and profit orientated modes of sociality consume other forms of being and relating It is essential reading for students and scholars of gender sexuality sociology and cultural studies as well as anyone who wants to understand the seduction industry s overarching logics and internal workings *Advances in Experimental Political Philosophy* Matthew Lindauer,2023-09-21 Political philosophy asks questions of great importance to our lives both as individuals and members of political communities What is justice What does the state owe to its citizens Under which conditions are different forms of government likely to be stable The relevance of empirical research to such questions however has been largely underexplored Introducing experimental political philosophy as a burgeoning field of inquiry this volume brings together leading scholars using empirical methods to shed light on questions of justice and politics and encourages them to reflect on the relationship of their methodologies to less empirically focused approaches Chapters cover traditional topics including distributive justice egalitarianism property rights and healthcare justice as well as outlining new directions and applications such as the problem of misogynistic extremist movements the public justification of immigration enforcement and the relationship between gender norms and support for care labor organizing The result is a unique collection that paves the way for further debates in the field and meaningful reflection on what it means for political philosophy to be empirically informed **De-Medicalizing Misery** M. Rapley,J. Moncrieff,J. Dillon,2011-10-12 Psychiatry and psychology have constructed a mental health system that does no justice to the problems it claims to understand and creates multiple problems for its users Yet the myth of biologically based mental illness defines our present The book rethinks madness and distress reclaiming them as human not medical experiences **Communicating Risk** Jonathan Crichton,Christopher N. Candlin,Arthur S. Firkins,2016-01-05 We live in world increasingly shaped by risk a fact underscored by recent events in the financial markets science and technology environmental policy and biosecurity law enforcement and criminal justice Risk assessment has become a central concern of governments organisations and the professions and the communication of risk is a crucial part of professional work Exploring how risk is discursively constructed across these domains is therefore central to our understanding of how professional practice affects people s lives Communicating Risk takes up this challenge with contributions from leading researchers and practitioners that examine key issues of risk communication across diverse professional domains Positioning Identities Hazel K Platzer,2017-07-12 How do lesbians and gays negotiate their sexual identities in mental health care contexts How do they manage the institutional homophobia and heterosexism embedded in health care practice and practitioners Using interpretive phenomenology Hazel Platzer overturns limiting dualisms to describe the ways in which lesbians and gays are silenced and pathologized in their mental health care encounters how they resist and how their resistance can restrict access to care She highlights the difficulties of researching a sensitive topic with a relatively hidden population and devises innovative techniques for handling bias and a multi methods approach to the phenomenological study of experience and identities She then offers proactive

steps toward creating a health care environment in which lesbian and gay identities are normalized improving both access to and quality of health care

**Using Narrative in Social Research** Jane Elliott, 2005-05-17

Jane Elliott's examination of the use of narrative within the broad context of social science inquiry is a must read for both qualitative and quantitative researchers novice and expert alike

Journal of Advanced Nursing

This important book does an impressive job of synthesising a complex literature and bringing together both qualitative and quantitative methods of narrative analysis It will become a milestone in the development of narrative methods Although ground breaking in many ways it is very clearly written and accessible to readers from a wide variety of backgrounds and methodological experience

Nigel Gilbert University of Surrey

An elegantly written scholarly and accessible text Jane Elliott shows a sophisticated appreciation of contemporary methodological developments and makes a persuasive case for the use of narrative approaches in both qualitative and quantitative research The book challenges and advances debates about combining methods and shows how stories can work within and across conventional research boundaries It is a truly original contribution to the literature

Amanda Coffey Cardiff School of Social Sciences

An outstanding book Jane Elliott breaks new ground by demonstrating to new generations of social scientists how the power of narrative can fruitfully be harnessed in social research This is a must read book

Professor Mike Savage University of Manchester

This is a lucid and accessible introduction to narrative methods in social research It is also an important book about the nature role and theoretical basis of research methodology in general Jane Elliott instructs the reader on the basic methods and methodological assumptions that form the basis of narrative methods She does so in a way that is practical and accessible and in a way that will make the book a favourite with students and experienced researchers alike Elliott argues that both qualitative and quantitative methods are characterised by a concern with narrative and that our research data can best be analyzed if it is seen in narrative terms In concrete step by step terms she details for the reader how to go about collecting data and how to subject that data to narrative analysis while at the same time placing this process in its wider theoretical context She works across the traditional quantitative qualitative divide to set out the ways in which narrative researchers can uncover such issues as social change causality and social identity She also shows how the techniques and skills used by qualitative researchers can be deployed when doing quantitative research and similarly how qualitative researchers can sometimes profit from using quantitative skills and techniques This book provides both a fascinating and a challenging read What sets this text apart from other books on research methodology and methods is that it does not focus exclusively on either quantitative or qualitative research approaches but rather attempts to bridge the divide The book should be compulsory reading not only for those aspiring to undertake narrative research and those students undertaking higher degree research courses but also for those more experienced researchers wishing to explore contemporary issues in research methods and methodology As a recent recruit to a lecturer/practitioner post with little recent experience in the subject area covered by this book I found it met my needs very well I would certainly recommend this book

for purchase Dr Andrew Pettipher University of Nottingham UK      **Democracy in Transition** Kyriakos N.

Demetriou,2012-12-22 The papers in this collection written by a cross regional group of experts provide insights into the causes of declining levels of citizen participation and other distinct forms of civic activism in Europe and explore a range of factors contributing to apathy and eventually disengagement from vital political processes and institutions At the same time this volume examines informal or unconventional types of civic engagement and political participation corresponding to the rapid advances in culture technology and social networking The volume is divided into three interrelated parts Part I consists of critical essays in the form of theoretical approaches to analysing weakening political participation and citizen estrangement Part II is dedicated to an exploration of the role and deployment of technologically advanced media such as the internet as determinants of changing patterns of political participationist behaviour Finally Part III presents findings of empirical research on the issue of political participation Combining theoretical and empirical perspectives the book contributes towards a better understanding of the disquieting trend of voter apathy and disenchantment with politics in the context of the ongoing process of European integration and offers a variety of analytical tools for decoding both the emergence of alternative conceptualizations of citizenship and other forms of meaningful civic and political engagement
