**Representing Translation** Dror Abend-David, 2019-02-21 In an increasingly global and multilingual society translators have transitioned from unobtrusive stagehands to key intercultural mediators a development that is reflected in contemporary media From Coppola's *Lost in Translation* to television's *House M.D.* and from live performance to social media translation is rendered as not only utilitarian but also performative and communicative In examining translation as a captivating theme in film television commercials and online content this multinational collection engages with the problems and limitations faced by translators as well as the ethical and philosophical aspects of translation and Translation Studies Contributors examine the role of the translator as protagonist agent negotiator and double agent translation in global communication the presentation of visual texts multilingualism in contemporary media and the role of foreign languages in advertisements Translation and translators are shown as inseparable parts of a contemporary life that is increasingly multilingual multiethnic multinational and socially diverse

**The Star Trek Encyclopedia** Michael Okuda, Denise Okuda, Debbie Mirek, 2011-05-17 From *Trek: The Motion Picture* to *Trek: The Motion Picture Part II* this book covers it all This is the ultimate reference book for all Star Trek fans Added to this edition are 128 new pages This addendum highlights the latest episodes of Star Trek Deep Space Nine Star Trek Voyager and the newest feature film Star Trek Insurrection The thousands of photos and hundreds of illustrations place the Star Trek universe at your fingertips Planets and stars weapons and ships people and places are just part of the meticulous research and countless cross reference that fill this book

**The Magic of Code** Samuel Arbesman, 2025-06-10 In the tradition of classics such as *The Lives of a Cell* a bold reframing of our relationship with technology that is more positive and human centered In the digital world code is the essential primary building block the equivalent of the cell or DNA in the biological sphere and almost as mysterious Code can create entire worlds real and virtual it allows us to connect instantly to people and places around the globe and it performs tasks that were once only possible in science fiction It is a superpower and not just in a technical sense It is also a gateway to ideas As vividly illustrated by Samuel Arbesman it is the ultimate connector providing new insight and meaning into how everything from language and mythology to biblical texts biology and even our patterns of thought connect with the history and nature of computing While the building block of code can be used for many wondrous things it can also create deeper wedges in our society and be weaponized to cause damage to our planet or our civilization Code and computing are too important to be left to the tech community it is essential that each of us engage with it And we fail to understand it to our detriment By providing us with a framework to think about coding and its effects upon the world and placing the past current and future developments in computing into its broader setting we see how software and computers can work for people as opposed to against our needs With this deeper understanding into the why of coding we can be masters of technology rather than its subjects

**Perspectives on the Age of the Earth and Why They Matter** Francis Ö. Dudás, 2020-02-13 Polls show almost half of

US adults believe that Earth is only 10 000 years old whereas scientists consider our planet to be 4 56 billion years old Examining these conflicting views illuminates aspects of the perceived conflict between religion and science and helps us understand the battles between evolutionist and creationist advocates This book examines how we approach knowledge and how we look at certainty It disentangles the threads of the traditional knowledge we are taught from the knowledge we gain from our own investigation of truth It argues that nature the basis of science and scripture the basis of religion derive from a single source Because of their shared origins religious and scientific perspectives grounded in verifiable truths must be in harmony The book presents the science behind the reliability of isotopic dates and critiques young earth creationist attacks on isotopic studies Though the nature of time is a philosophical issue its measurement is a scientific venture that has affirmed that Earth is 4 56 billion years old The harmony of science and religion based on recognition of their single source is a prerequisite for the progress of humanity as a whole

**Science Fiction and The Abolition of Man** Mark J. Boone, Kevin C. Neece, 2016-12-13 The Abolition of Man C S Lewis s masterpiece in ethics and the philosophy of science warns of the danger of combining modern moral skepticism with the technological pursuit of human desires The end result is the final destruction of human nature From Brave New World to Star Trek from steampunk to starships science fiction film has considered from nearly every conceivable angle the same nexus of morality technology and humanity of which C S Lewis wrote As a result science fiction film has unintentionally given us stunning depictions of Lewis s terrifying vision of the future In Science Fiction Film and the Abolition of Man scholars of religion philosophy literature and film explore the connections between sci fi film and the three parts of Lewis s book how sci fi portrays Men without Chests incapable of responding properly to moral good how it teaches the Tao or The Way and how it portrays The Abolition of Man

**Disability, Medicine, and Healing Discourse in Early Christianity** Susan R. Holman, Chris L. de Wet, Jonathan L. Zeicher, 2023-08-04 Using contemporary theories drawn from health humanities this volume analyses the nature and effects of disability medicine and health discourse in a variety of early Christian literature In recent years the medical turn in early Christian studies has developed a robust literature around health disability and medicine and the health humanities have made critical interventions in modern conversations around the aims of health and the nature of healthcare Considering these developments it has become clear that early Christian texts and ideas have much to offer modern conversations and that these texts are illuminated using theoretical lenses drawn from modern medicine and public health The chapters in this book explore different facets of early Christian engagement with medicine either in itself or as metaphor and material for theological reflections on human impairment restoration and flourishing Through its focus on late antique religious texts the book raises questions around the social rather than biological aspects of illness and diminishment as a human experience as well as the strategies by which that experience is navigated The result is an innovative and timely intervention in the study of health and healthcare that bridges current divides between

historical studies and contemporary issues Taken together the book offers a prismatic conversation of perspectives on aspects of care at the heart of societal and individual wellness today inviting readers to meet or revisit patristic texts as tracings across a map of embodied identity dissonance and corporal care It is a fascinating resource for anyone working on ancient medicine and health or the social worlds of early Christianity *Exploring Space: 1999* John Kenneth Muir,2015-09-15

Starring internationally renowned actors Martin Landau Barbara Bain Barry Morse and Catherine Schell the British made Space 1999 was the only truly original space adventure of the mid 1970s Sandwiched between the demise of the original Star Trek and the opening of the Stars Wars series on the big screen Space 1999 featured a richly visualized world where space was terrifying and mysterious where not all problems were solvable by technology and the space travelers were very human From the science fiction show s conception in 1973 to its cancellation in 1977 this reference work covers each of the 48 episodes in depth including a full plot synopsis writer director guest star credits and critical commentary that examines both the episode and other shows that have used similar plotlines The popularity of Space 1999 memorabilia and its many fan clubs are fully discussed along with the possibility of a future movie or reunion show that would tie up the loose ends caused by the show s abrupt cancellation

**Technologies of Vision** Steve F Anderson,2017-10-20 An investigation of the computational turn in visual culture centered on the entangled politics and pleasures of data and images If the twentieth century was tyrannized by images then the twenty first is ruled by data In Technologies of Vision Steve Anderson argues that visual culture and the methods developed to study it have much to teach us about today s digital culture but first we must examine the historically entangled relationship between data and images Anderson starts from the supposition that there is no great divide separating pre and post digital culture Rather than creating an insular field of new and inaccessible discourse he argues it is more productive to imagine that studying the digital is coextensive with critical models especially the politics of seeing and knowing developed for understanding the visual Anderson s investigation takes on an eclectic array of examples ranging from virtual reality culture analytics and software art to technologies for computer vision face recognition and photogrammetry Mixing media archaeology with software studies Anderson mines the history of technology for insight into both the politics of data and the pleasures of algorithms He proposes a taxonomy of modes that describe the functional relationship between data and images in the domains of space surveillance and data visualization At stake in all three are tensions between the totalizing logic of data and the unruly chaos of images *The Physics and Astronomy of Science Fiction* Steven D. Bloom,2016-07-13

The great scientific astronomical and technological advances of the 20th century inspired the science fiction genre to imagine distant worlds and futures far beyond the discoveries of the here and now This book explores science fiction films television series novels and short stories from Lost in Space 1965 1968 to Fringe 2008 2013 to the works of Isaac Asimov and Stephen Baxter with a focus on their underlying concepts of physics and astronomy Assessing accuracy and plausibility the author considers the possibilities of solar system interstellar and faster than light
