constellations are known as the 27 Nakshatra which are 300 to 400 light years away from earth Based on a person's moon Nakshatra at the time of birth Jyotish offers a most powerful predictive technique compared to other forms of astrology

Abraham Ibn Ezra Latinus on Nativities, 2019-03-27 Abraham Ibn Ezra was reborn in the Latin West in the last decades of the thirteenth century thanks to a plethora of authored and anonymous Latin translations of his astrological writings The present volume offers the first critical edition accompanied by an English translation a commentary and an introductory study of *Liber nativitatum* Book of Nativities and *Liber Abraham Iudei de nativitatibus* Book on Nativities by Abraham the Jew two astrological treatises in Latin that were written by Abraham Ibn Ezra or attributed to him and whose Hebrew source text or archetype has not survived The first is undoubtedly an anonymous Latin translation of the second version of Ibn Ezra's *Sefer ha moladot* Book of Nativities whose Hebrew source text is otherwise lost The second is the most mysterious specimen among the Latin works attributed to Ibn Ezra that have no extant Hebrew counterpart The present volume shows not only that the *Liber Abraham Iudei de nativitatibus* underwent a significant metamorphosis over time and was transmitted in four significantly different versions but also that its date of composition is not that previously accepted by modern scholarship These volumes represent a major achievement in the history of medieval astrology and it is no wonder that they have already become classics often referred to by specialists in the field including by this reviewer David Juste *Ptolemaeus Arabus et Latinus* Munich Journal for the History of Astronomy 51 I 2020

A New and Complete Illustration of the Celestial Science of Astrology; Or, The Art of Foretelling Future Events and Contingencies Ebenezer Sibly, 1826 **Abraham Ibn Ezra Latinus on Elections and Interrogations**, 2020-05-11 As a result of Abraham Ibn Ezra's increasing popularity after his death there were repeated waves of translation of collections of his Hebrew astrological treatises into Latin and into the emerging European vernaculars A study of these versions affords us a golden opportunity to shed light on a significant missing link in our knowledge of Ibn Ezra's astrological oeuvre The present volume offers the first critical edition accompanied by an English translation a commentary and an introductory study of three Latin texts on the astrological doctrines of elections and interrogations written by or attributed to Abraham Ibn Ezra the *Liber electionum* the *Liber interrogationum* and the *Tractatus particulares* **HYBRID ASTROLOGY (DNA + VEDIC)** C C SANTHOSH
