Robots That Kill Judith A. Markowitz, 2019-04-11 This book describes real world killer robots using a blend of perspectives. Overviews of technologies such as autonomy and artificial intelligence demonstrate how science enables these robots to be effective killers. Incisive analyses of social controversies swirling around the design and use of killer robots reveal that science alone will not govern their future. Among those disputes is whether fully autonomous robotic weapons should be banned. Examinations of killers from the golem to Frankenstein's monster reveal that artificially created beings like them are precursors of real 21st century killer robots. This book laces the death and destruction caused by all these killers with science and humor. The seamless combination of these elements produces a deeper and richer understanding of the robots around us.

Neverending Stories R. Lyle Skains, 2022-12-29 Winner of the 2023 N Katherine Hayles Award for Criticism of Electronic Literature. Digital fiction has long been perceived as an experimental niche of electronic literature. Yet born digital narratives thrive in mainstream culture as communities of practice create and share digital fiction filling in the gaps between the media they are given and the stories they seek. *Neverending Stories* explores the influences of literature and computing on digital fiction and how the practices and cultures of each have impacted who makes and plays digital fiction. Popular creativity emerges from subordinated groups often excluded from producing cultural resources accepting the materials of capitalism and inverting them for their own carnivalesque uses. Popular digital fiction goes by many different names: webnovels, adventure games, visual novels, Twitter fiction, webcomics, Twine games, walking sims, alternate reality games, virtual reality films, interactive movies, enhanced books, transmedia universes, and many more. The book establishes digital fiction in a foundation of innovation tracing its emergence in various guises around the world. It examines Infocom whose commercial success with interactive fiction crumbled in no small part because of its failure to consider women as creators or consumers. It takes note of the brief flourish of commercial book apps and literary games. It connects practices of cognitive and conceptual interactivity and textual multiplicity dating to the origins of the print novel to the feminine. It pushes into the technological future of narrative in immersive and mixed realities. It posits the transmedia franchises and the practices of fanfiction as examples of digital fiction that will continue indefinitely regardless of academic notice or approval.

Exploring Picard's Galaxy Peter W. Lee, 2018-02-13 Serving as the sequel to Gene Roddenberry's original television series *Star Trek: The Next Generation* pushed the boundaries of the final frontier. This collection of new essays explores both the series characters and its themes. Topics include the Federation's philosophy concerning technocracy, sexuality, and biopolitics; foreign policy shifts in the Prime Directive; key characters including Jean-Luc Picard, Data, Deanna Troi, Tasha Yar, and Klingon martial arts, music, and history.

Gonzalez,2019-02-01 Reality is made up of the Absolute and Causality The absolute most saliently philosophized about by
Georg Hegel is where normative values inhere Causality can be described as the measurable effects of the normative values
of the absolute and the laws of physics also ostensibly a product of the absolute Humans are special insofar as they access
the higher aspects of the Absolute altruism compassion love humor science engineering etc The Absolute also contains what
can be considered the less attractive values or impulses greed lust for power hate self centeredness conceit etc Predicating
society on what I deem the lower spirits aspects of the absolute most prominently greed results in personal social dysfunction

and ultimately the end of civilization Conversely a society based on justice is stable and vibrant Justice is a classless society free of gender and ethnic biases My argument is based on popular culture especially the Star Trek franchise One implication of my thesis is that capitalist values generate psychological neurosis and societal instability even catastrophe Additionally the political values that dominate the current neoliberalist world system and especially the American government are the other the will to power resulting in war and global political instability Popular culture is germane to philosophy and contemporary politics because television movie creators frequently try to attract viewers by conveying authentic philosophical and political motifs Conversely viewers seek out authentic movies and television shows This is in contrast to opinion surveys for instance as the formation of the data begins with the surveyor seeking to directly solicit an opinion however impromptu or shallow
