Prior to the 1920s it was generally thought with a few exceptions that our galaxy the Milky Way was the entire Universe Based on the work of Henrietta Leavitt with Cepheid variables astronomer Edwin Hubble was able to determine that the Andromeda Galaxy and others had to lie outside our own Moreover based on the work of Vesto Slipher involving the redshifts of these galaxies Hubble was able to determine that the Universe was not static as had been previously thought but expanding The number of galaxies has also been expanding with estimates varying from 100 billion to 2 trillion While every galaxy in the Universe is interesting just by its very fact of being the author has selected 51 of those that possess some unusual qualities that make them of some particular interest These galaxies have complex evolutionary histories with some having supermassive black holes at their core others are powerful radio sources a very few are relatively nearby and even visible to the naked eye whereas the light from one recent discovery has been travelling for the past 13.4 billion years to show us its infancy and from a time when the Universe was in its infancy And in spite of the vastness of the Universe some galaxies are colliding with others embraced in a graceful gravitational dance Indeed as the Andromeda Galaxy is heading towards us a similar fate awaits our Milky Way When looking at a modern image of a galaxy one is in awe at the sheer wondrous nature of such a magnificent creation with its boundless secrets that it is keeping from us its endless possibilities for harboring alien civilizations and we remain left with the ultimate knowledge that we are connected to its glory

Martinique when the yellow fever carried off one of his children By a singular reaction in his vigorous temperament it was about this time that his somber melancholy gave way to a bitter and sarcastic gayety more in harmony with his nature From his early youth he had had a taste for jocularly a mocking turn of spirit seasoned by that ironical grace of manner peculiar to the great Moscovite nobleman and resulting from the constant habit of trifling with men and events His recovery did not however restore the agreeable manners which in former times had distinguished him in his intercourse with the world Suffering had brought him a leaven of misanthropy which he did not take the trouble of disguising his voice had lost its caressing notes and had become rude and abrupt his actions were brusque and his smile scornful Sometimes his bearing gave evidence of a haughty will which tyrannized over by events sought to avenge itself upon mankind
