Hui-Chung,2021-09-01 An Illustrated Guide to the Aging Phenomena in Life Aging will slowly penetrate every aspect of life My favorite foods no longer taste as good as they once did The place I live in felt very noisy all in a sudden After finally retiring I start to have personal time but nothing seems to arouse my interest Have you or your family ever had these problems In fact these troubles are all caused by aging Aging is a natural process If you don t pay special attention to it in time these small troubles will snowball into big ones Long repressed psychological pressure will eventually burst out and transform into behaviors that others find annoying Gradually you will become a difficult old man woman who you don t even like A problem that neither patience nor companionship can solve Long term suppression may cause greater emotional rebound making pure companionship hard to last long Everything has a lifespan and the body isn t an exception However in the face of the various troubles in life caused by aging people still subconsciously encourage them to hang in there or ask the people around them to be with them more However what is required isn t short term tolerance but rather day after day and year after year of patience The so called accompaniment often hurts each other since they don t know how to do it right The life of the person involved is filled by these sufferings caused by aging and may in turn make the family members accompanying them feel uncomfortable Aging is not a disease Only by understanding the aging of the body and the various possible behaviors after aging can we better respond to it When encountering problems related to aging the author noticed that many people may intuitively think Is there any way to cure aging If the problem isn t cured it is not a good way This notion may cause many people to go all the way from regular medical treatment to unpopular remedies and eventually delay the time for rehabilitation When facing the problem of aging many people see it as a disease If it cannot be cured there s nothing else to do However the author does not agree with this statement In fact many problems in life are not simply caused by aging but the result of the interaction between aging and the environment Although the human body ages it still retains considerable flexibility in adapting to the environment Even if the aging situation is severe many of the problems encountered in life can still be improved As long as we understand the mechanism of body aging and take appropriate countermeasures against the tendency of aging we can immediately improve the current quality of life and effectively delay the symptoms of aging
