The Job Ladder Gary S. Fields, T. H. Gindling, Kunal Sen, Michael Danquah, Simone Schotte, 2023-03-09 This is an open access title available under the terms of a CC BY NC SA 3.0 IGO licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Based on studies of a range of countries in the Global South this book examines heterogeneity within informal work by applying a common conceptual framework and empirical methodology The country studies use panel data to study the dynamics of worker transitions between formal and heterogeneous informal work and present a comparative perspective across developing countries in Asia Latin America Sub Saharan Africa and North Africa and the Middle East Each study provides a nuanced view of informality dividing workers into six work statuses formal wage employees upper tier informal

wage employees lower tier informal wage employees formal self employed and upper tier informal self employed Based on this common conceptual framework the country studies examine the distribution of workers across each of these work statuses and document transition patterns across different formality and work statuses The panel data analysed in each country study provide a basis for making statements about labour market transitions that are not warranted when using comparable cross sections The studies also examine the individual and household level characteristics associated with workers in each work status Using these characteristics each study constructs a job ladder that ranks each work status and then examines the characteristics of workers that are associated with transitions up and down the job ladder

Home, School and Work M. P. Carter,2013-10-22 Home School and Work A Study of the Education and Employment of Young People in Britain describes the events during the period of transition from school to work This

book is divided into 16 chapters that consider the influences of home and school in young people's behavior and attitude. The opening chapters survey the attitudes towards school leaving, school and starting work, including views about the school leaving age in Britain. The next chapters discuss the extent of knowledge about work in general and about particular occupations as well as methods of finding work. These topics are followed by descriptions of formal and informal reception and initiation into the world of work along with the attitudes towards employers and other workers. This text also looks into the number and frequency of job changes and the reasons for the changes. A chapter examines the attitudes towards Trade Unions and the link between education and employment. The closing chapters deal with the changes in leisure activities and in pocket money. The relative importance of school work and leisure is also discussed.

Netcentric System of Systems Engineering with DEVS Unified Process Saurabh Mittal, José L. Risco Martín, 2013-02-22

In areas such as military security, aerospace and disaster management, the need for performance optimization and interoperability among heterogeneous systems is increasingly important. Model driven engineering, a paradigm in which the model becomes the actual software, offers a promising approach toward systems of systems (SoS) engineering. However, model driven engineering has largely been unachieved in complex dynamical systems and netcentric SoS partly because modeling and simulation M/S frameworks are stove piped and not designed for SoS composability. Addressing this gap, Netcentric System of Systems Engineering with DEVS Unified Process presents a methodology for realizing the model driven engineering vision and netcentric SoS using DEVS Unified Process (DUNIP). The authors draw on their experience with Discrete Event Systems Specification (DEVS) formalism, System Entity Structure (SES) theory and applying model driven engineering in the context of a netcentric SoS. They describe formal model driven engineering methods for netcentric M/S using standards based approaches to develop and test complex dynamic models with DUNIP. The book is organized into five sections. Section I introduces undergraduate students and novices to the world of DEVS. It covers systems and SoS M/S as well as DEVS formalism, software modeling language and DUNIP. It also assesses DUNIP with the requirements of the Department of Defense's DoD Open Unified Technical Framework (OpenUTF) for netcentric Test and Evaluation (T/E). Section II delves into M/S based systems engineering for graduate students, advanced practitioners and industry professionals. It provides methodologies to apply M/S principles to SoS design and reviews the development of executable architectures based on a framework such as the Department of Defense Architecture Framework (DoDAF). It also describes an approach for building netcentric knowledge based contingency driven systems. Section III guides graduate students, advanced DEVS users and industry professionals who are interested in building DEVS virtual machines and netcentric SoS. It discusses modeling, standardization, the deployment of models and simulators in a netcentric environment, event driven architectures and more. Section IV explores real world case studies that realize many of the concepts defined in the previous chapters. Section V outlines the next steps and looks at how the modeling of netcentric complex adaptive systems can be attempted using DEVS concepts. It touches on the boundaries of

DEVS formalism and the future work needed to utilize advanced concepts like weak and strong emergence self organization scale free systems run time modularity and event interoperability This groundbreaking work details how DUNIP offers a well structured platform independent methodology for the modeling and simulation of netcentric system of systems

The Lives of Campus Custodians Peter M. Magolda,2023-07-03 This unique study uncovers the lives and working conditions of a group of individuals who are usually rendered invisible on college campuses the custodians who daily clean the offices residence halls bathrooms and public spaces In doing so it also reveals universities equally invisible practices that frequently contradict their espoused values of inclusion and equity and their profession that those on the margins are important members of the campus community This vivid ethnography is the fruit of the year s fieldwork that Peter Magolda s undertook at two universities His purpose was to shine a light on a subculture that neither decision makers nor campus community members know very much about let alone understand the motivations and aspirations of those who perform this

work and to pose fundamental questions about the moral implications of the corporatization of higher education and its impact on its lowest paid and most vulnerable employees Working alongside and learning about the lives of over thirty janitorial staff Peter Magolda becomes privy to acts of courage resilience and inspiration as well as witness to their work ethic and to instances of intolerance inequity and injustices We learn the stories of remarkable people and about their daily concerns their fears and contributions Peter Magolda raises such questions as Does the academy still believe wisdom is exclusive to particular professions or classes of people Are universities really inclusive Is addressing service workers concerns part of the mission of higher education If universities profess to value education why make it difficult for those on the margins such as custodians to get educated The book concludes with the research participants and the author s reflections about ways that colleges can improve the lives of those whose underpaid and unremarked labor is so essential to the smooth running of their campuses Appendices provide information about the research methodology and methods as well as a discussion of the influence of corporate managerialism on ethnographic research
