Nettles, Michael T. Nettles, 2012-12-06 Measuring Up revisits vital issues of equity and

assessment through the research efforts and insights of many of the nation's most prominent educators and assessment experts. As its most urgent purpose, the publication aims to sensitize readers to the unfairness and inappropriate uses of testing instruments which, under optimal circumstances, have the potential to benefit all students. With America fervently espousing both national and state testing, the differential performance by race and social class raises the specter of tests as barriers to life milestones such as promotion, graduation, and college admissions. In response to such punitive testing, the papers included here explore a host of models and practices that are currently being piloted both in America and abroad as educators grapple with the effects the assessment is having on minority and disadvantaged students and school systems. In the process, outcomes of innovative portfolio and authentic assessments are weighed against important standards and principles of validity and consequences. As the various authors probe the gap between African American and White test scores, they raise important questions of resources, family background, and educational opportunity. Beyond their value of their recommendations to educators, their papers help to identify causes of pupil deficiencies in ways that can be addressed by policymakers. To reinforce the emphasis on equity, several authors present a definitive defense of affirmative action as a critical countermeasure to the lack of fairness in school quality, family, and social supports, and educational resources.

**Athenaeum**, 1860     Stray pearls Charlotte Mary Yonge, 1883     The Dial Francis Fisher Browne, 1893     Getting Ready for Benjamin Rita M. Kissen, 2002-10-23. This book argues that issues of sexual diversity are inextricably interwoven into the basic concerns of pre-service teacher education. How do we make our students aware of assumptions regarding masculinity, femininity, and sexuality that arise from what is presented, represented, or omitted from curricula and classroom practice? What do we say about homophobia and heterosexism as we anticipate the administrative hierarchies, school cultures, parent and community politics they will encounter as teachers? What special challenges might face a teacher, straight or gay, who discusses sexual orientation in a high school classroom or responds to a homophobic remark in the hallway or the cafeteria? How should we prepare a teacher for a parent conference with two moms or two dads? The essays in this volume range from an analysis of gay stereotypes in teacher education textbooks to a discussion of queer multiculturalism to personal accounts by lesbian and gay teacher educators and heterosexual allies who are challenging homophobia and heterosexism in their own classrooms and programs. All agree that education for sexual diversity is as important as education about all other forms of difference, and that future teachers need to know how to create safe spaces for lesbian and gay students along with the children of gay families who are increasingly a part of the classroom landscape.     **Ready-to-tell Tales** Bill Mooney, 1994.
