The Long Fuse:

The Long Fuse Laurence Davis Lafore, 1965 The interpretation of the origins of World War I
Laurence Lafore, 1997-05-15 In analyzing the causes of World War I without concern for the question of guilt the author places emphasis on two central facts first that when statesmen and peoples took actions they knew might lead to war they were not envisaging the catastrophe that the war became but rather a quick and limited war and second that among the many conflicts that might have led to war the one that did was the threat to the integrity of Austria Hungary posed by Serbia and Serb nationalism

The Longest Boundary: How the US-Canadian Border's Line came to be where it is, 1763-1910 (Consolidated edition) John Dunbabin, 2024-04-25 A consolidated eBook of Volume one and Volume two of *The Longest Boundary* by John Dunbabin These volumes are firmly based on primary sources but written in a way that should appeal to the general reader as much as to specialised historians Its chief actors are politicians and administrators but there is a range of others extending from First Nations chiefs to goldminers railway entrepreneurs prophets and policemen In the concluding chapter the book's general historical approach is supplemented by assessment of the main perspectives of international relations theory Finally attention is drawn to small anomalies created by the boundary line

Timetrees: Incorporating Fossils and Molecules, 2nd edition Michel Laurin, Gilles Didier, Rachel C. M. Warnock, 2022-09-15 Calibrating phylogenies to time is central to addressing many questions in evolutionary biology and macroevolution The fossil record once provided our only source for establishing a timeline for evolution However the incompleteness of the fossil record and the non uniformity of fossil recovery rate make it challenging to obtain precise estimates of divergence times from fossil evidence alone Molecular dating which combines evidence from the geological and molecular records enables us to generate a much more complete and precise timeline of events The molecular clock can be time calibrated using temporal evidence from fossils and used to estimate divergence times based on the assumption that the rate of sequence evolution will be approximately constant over time and among lineages Methodological challenges to applying this concept in practice have been to relax the assumption of constant evolutionary rates and to model the uncertainty associated with paleontological and geological calibrations To this end available statistical methods have become increasingly complex in order to capture key features of empirical data These are typically applied using Bayesian inference which provides a powerful framework for incorporating multiple sources of uncertainty Although overall more effort has been expended in developing models of molecular sequence evolution critical advances have also included approaches to modeling taxonomic diversification and fossilization In particular recent advances in birth death process models have allowed for continuous sampling along lineages enabling more information from the fossil record to be incorporated into dating analyses in a statistically coherent way In addition available dating methods can now be

applied to scenarios in which no molecular data may be available allowing for novel insights into the evolution of entirely extinct clades Other recent innovations enable us to date divergence times among taxa that have no fossil record including the use of gene duplication events or biogeographic evidence Furthermore time calibrated trees are necessary for obtaining phylogenetic estimates of taxonomic diversification and extinction rates which can now be jointly inferred along with lineage divergence times These approaches offer an exciting opportunity to understand the evolution of life in deep time although key challenges remain especially with regards to modeling the processes of genome evolution taxonomic diversification and fossil recovery In this Research Topic we focus on recent advances in methodology outstanding challenges and the application of molecular and paleontological dating methods to empirical case studies across the Tree of Life

Each Goldfish is Hand Painted Jules Leigh Koch, 2002 Koch is a poet who like the Impressionists works en plein air He is a colourist a sketcher with words who sets up his easel at the beach in city streets suburban backyards and gum forests With affection he records the quotidian details of our suburbs working with quick dabs bright splashes of colour and deftly caught feelings

The Young Lions Irwin Shaw, 2013-02-26 One of the great World War II novels this New York Times bestselling masterpiece captures the experiences of three very different soldiers The Boston Globe Standing alongside Norman Mailer's *The Naked and the Dead* and James Jones's *From Here to Eternity* *The Young Lions* is one of the most powerful American novels to tackle the Second World War Ambitious in its scope and robust in its prose Irwin Shaw's work is also deeply humanistic presenting the reality of war as seen through the eyes of ordinary soldiers on both sides The story follows the individual dramas and ultimately intertwined destinies of Christian Diestl a Nazi sergeant Noah Ackerman a Jewish American infantryman and Michael Whitacre an idealistic urbanite from the New York theatrical world Diestl first appears as a dashing ski instructor in Austria mouthing his loyalty to Nazi ideals As the war progresses Diestl's character continues to erode as he descends into savagery Ackerman must endure domestic anti-Semitism and beatings in boot camp before proving himself in the European theater Eventually as part of the liberating army he comes face to face with the unimaginable horrors of the death camps Whitacre trading cocktail parties for Molotov cocktails confronts the barbarism of war and in fighting simply to survive finds his own capacity for heroism Shaw's sweeping narrative is at once vivid exciting and brutally realistic as well as poignant in its portrayal of the moral devastation and institutional insanity of war Penned by a master storyteller at the height of his craft *The Young Lions* stands the test of time as a classic novel of war and the human experience This ebook features an illustrated biography of Irwin Shaw including rare images and never before seen documents from the author's estate
