Routledge Revivals: Medieval Italy (2004) Christopher Kleinhenz, 2017-07-05 First published in 2004 Medieval Italy An Encyclopedia provides an introduction to the many and diverse facets of Italian civilization from the late Roman empire to the end of the fourteenth century It presents in two volumes articles on a wide range of topics including history literature art music urban development commerce and economics social and political institutions religion and hagiography philosophy and science This illustrated A Z reference is a cross disciplinary resource and will be of key interest not only to students and scholars of history but also to those studying a range of subjects as well as the general reader **Byzantium, Venice and the Medieval Adriatic** Magdalena Skoblar, 2021-04-15 The Adriatic has long occupied a liminal position between different cultures languages and faiths This book offers the first synthesis of its history between the seventh and the mid fifteenth century a period coinciding with the existence of the Byzantine Empire which as heir to the Roman Empire lay claim to the region The period also saw the rise of Venice and it is important to understand the conditions which would lead to her dominance in the late Middle Ages An international team of historians and archaeologists examines trade administration and cultural exchange between the Adriatic and Byzantium but also within the region itself and makes more widely known much previously scattered and localised research and the results of archaeological excavations in both Italy and Croatia Their bold interpretations offer many stimulating ideas for rethinking the entire history of the Mediterranean during the period

Communities and Crisis Shona Kelly Wray, 2009 Bologna is well known for its powerful university and notariate of the thirteenth century but the fourteenth century city is less studied This work redresses the imbalance in scholarship by examining social and economic life at mid fourteenth century particularly during the epidemic of plague the Black Death of 1348 Arguing against medieval chroniclers accounts of massive social political and religious breakdown this examination of the immediate experience of the epidemic based on notarial records including over a thousand testaments demonstrates

resilience during the crisis The notarial record reveals the activities and decisions of large numbers of individuals and families in the city and provides a reconstruction of the behavior of clergy medical practitioners government and neighborhood officials and notaries during the epidemic

Dante's Enigmas Richard Kay,2024-10-28 Dante's Comedy is a puzzling poem because the author wanted to lead his readers to understanding by engaging their curiosity While many obscure matters are clarified in the course of the poem itself others have remained enigmas that have fascinated Dantists for centuries Over the last thirty five years Richard Kay has proposed original solutions to many of these puzzles these are collected in the present volume Historical context frames Kay's readings which relate the poem to such standard sources as the Bible Aristotle Aquinas and the Latin classics but he also goes beyond these Scholastic sources to exploit Dante's use of less familiar aspects of Latin clerical culture including physiognomy Vitruvian proportions and optics and most especially astrology Kay explores new ways to read the Comedy For instance he argues that Dante has embedded references to his authorities in a continuous series of acrostics formed by the initial letters of each tercet Again he shows how Dante returns to the theme of each infernal canto and develops it in the parallel cantos of Purgatorio and Paradiso Particularly worthy of note are four essays on the poem's finale in the Empyrean

War and Competition between States Philippe Contamine,2000-11-23 In the five hundred years covered by this volume there was scarcely a year which passed without either war or some open demonstration of hostility between the many sovereign powers which governed Europe States and peoples lived under the shadow of war were ceaselessly prompted to consider the possibility of war had to find ways of dealing with the consequences of war This volume in the Origins of the Modern State in Europe series focuses on the crucial role of war in the formation of state systems It starts from the assumption that interstate rivalries and conflicts were at the heart not only of the demarcation of territories but also of the ever growing need to mobilize resources for warfare Institutionalization was consequently highly dependent on such competition It was for military reasons and with military aims that the state secured control of time and space both at sea and on land The Origins of the Modern State in Europe series arises from an important international research programme sponsored by the European Science Foundation The aim of the series which comprises seven volumes is to bring together specialists from different countries who reinterpret from a comparative European perspective different aspects of the formation of the state over the long period from the beginning of the thirteenth to the end of the eighteenth century One of the main achievements of the research programme has been to overcome the long established historiographical tendency to regard states mainly from the viewpoint of their twentieth century borders
