The Ludic Self in Seventeenth-Century English Literature Anna K. Nardo, 1991-01-01 This book argues that play offered Hamlet John Donne George Herbert Andrew Marvell Robert Burton and Sir Thomas Browne a way to live within the contradictions and conflicts of late Renaissance life by providing a new stance for the self Grounding its argument in recent theories of play and in a historical analysis that sees the seventeenth century as a point of crisis in the formation of the western self the author demonstrates how play helped mediate this crisis and how central texts of the period enact this mediation

Presenting Gender Chris Mounsey, 2001 A collection of essays that concerns writers or real people of the early modern period who presented their protagonists or themselves as members of the opposite biological sex The collection demonstrates the variety of motives for such acts of gender passing and offers interpretations that shed some light on the probable intentions of the gender passers

Childhood by Design Megan Brandow-Faller, 2018-04-19 Informed by the analytical practices of the interdisciplinary material turn and social historical studies of childhood *Childhood By Design Toys and the Material Culture of Childhood* offers new approaches to the material world of childhood and design culture for children This volume situates toys and design culture for children within broader narratives on history art design and the decorative arts where toy design has traditionally been viewed as an aberration from more serious pursuits The essays included treat toys not merely as unproblematic reflections of socio cultural constructions of childhood but consider how design culture actively shaped commodified and materialized shifting discursive constellations surrounding childhood and children Focusing on the new array of material objects designed in response to the modern invention of childhood what we might refer to as objects for a childhood by design *Childhood by Design* explores dynamic tensions between theory and practice discursive constructions and lived experience as embodied in the material culture of childhood Contributions from and between a variety of disciplinary perspectives including history art history material cultural studies decorative arts design history and childhood studies are represented critically linking historical discourses of childhood with close study of material objects and design culture Chronologically the volume spans the 18th century which witnessed the invention of the toy as an educational plaything and a proliferation of new material artifacts designed expressly for children s use through the 19th century expansion of factory based methods of toy production facilitating accuracy in miniaturization and a new vocabulary of design objects coinciding with the recognition of childhood innocence and physical separation within the

household towards the intersection of early 20th century child centered pedagogy and modernist approaches to nursery and furniture design through the changing consumption and sales practices of the postwar period marketing directly to children through television film and other digital media and into the present where the line between the material culture of childhood and adulthood is increasingly blurred

The Ambiguity of Play Brian Sutton-Smith, 2009-06-30 Every child knows what it means to play but the rest of us can merely speculate Is it a kind of adaptation teaching us skills inducting us into certain communities Is it power pursued in games of prowess Fate deployed in games of chance Daydreaming enacted in art Or is it just frivolity Brian Sutton Smith a leading proponent of play theory considers each possibility as it has been proposed elaborated and debated in disciplines from biology psychology and education to metaphysics mathematics and sociology Sutton Smith focuses on play theories rooted in seven distinct rhetorics the ancient discourses of Fate Power Communal Identity and Frivolity and the modern discourses of Progress the Imaginary and the Self In a sweeping analysis that moves from the question of play in child development to the implications of play for the Western work ethic he explores the values historical sources and interests that have dictated the terms and forms of play put forth in each discourse s objective theory This work reveals more distinctions and disjunctions than affinities with one striking exception however different their descriptions and interpretations of play each rhetoric reveals a quirkiness redundancy and flexibility In light of this Sutton Smith suggests that play might provide a model of the variability that allows for natural selection As a form of mental feedback play might nullify the rigidity that sets in after successful adaption thus reinforcing animal and human variability Further he shows how these discourses despite their differences might offer the components for a new social science of play

An Andrew Marvell Companion (Routledge Revivals) Robert H. Ray, 2014-05-01 First published in 1998 this title provides for the reader of the renowned metaphysical poet and politician a valuable reference and resource volume It is a compendium of useful information for any reader of Andrew Marvell including crucial biographical material historical

contextualisation and details about his life's work. The intention throughout is to enhance understanding and appreciation without being exhaustive. The major portion of the volume in both importance and size is *A Marvell Dictionary*. Its entries are arranged alphabetically; they identify, describe and explain the most influential persons in Marvell's life and works as well as places, characters, allusions, ideas, concepts, individual words, phrases and literary terms that are relevant to a rounded appreciation of his poetry and prose. *An Andrew Marvell Companion* will prove invaluable for all students of English poetry and seventeenth century political history.

The Variorum Edition of the Poetry of John Donne, Volume 4.2 John Donne, 2021-11-02. This volume, the ninth in the series of *The Variorum Edition of the Poetry of John Donne*, presents newly edited critical texts of 25 love lyrics. Based on an exhaustive study of the manuscripts and printed editions in which these poems have appeared, Volume 4.2 details the genealogical history of each poem, accompanied by a thorough prose discussion as well as a General Textual Introduction of the Songs and Sonets collectively. The volume also presents a comprehensive digest of the commentary on these Songs and Sonets from Donne's time through 1999. Arranged chronologically within sections, the material for each poem is organized under various headings that complement the volume's companions, Volume 4.1 and Volume 4.3.

Robert Burton and the Transformative Powers of Melancholy Stephanie Shirilan, 2016-03-03. Few English books are as widely known, underread and underappreciated as Robert Burton's *The Anatomy of Melancholy*. Stephanie Shirilan laments that modern scholars often treat the *Anatomy* as an unmediated repository of early modern views on melancholy, overlooking the fact that Burton is writing a cento, an ancient form of satire that quotes and misquotes authoritative texts in often subversive ways and that his express intent in so doing is to offer his readers literary therapy for melancholy. This book explores the ways in which the *Anatomy* dispenses both direct physic and more systemic medicine by encouraging readers to think of melancholy as a privileged mental and spiritual acuity that requires cultivation and management rather than cure. Refuting the prevailing historiography of anxious early modern embodiment that cites Burton as a key witness, Shirilan submits that the *Anatomy* rejects contemporary Neostoic and Puritan approaches to melancholy. She reads Burton's erraticism, opacity and theatricality as modes of resistance against demands for constancy, transparency and plainness in the popular literature of spiritual and moral hygiene of his day. She shows how Burton draws on rhetorical, theological and philosophical traditions that privilege the transformative powers of the imagination in order to celebrate melancholic impressionability for its capacity to inspire and engender empathy, charity and faith.

Arenas of Conflict Kristin Pruitt McColgan, Charles W. Durham, 1997. The nineteen essays in this collection explore such varied fields of argument as John Milton's authorship of the *Christian Doctrine*, his adaptations of source material, his engagement in political controversies, his attitudes toward gender in *Paradise Lost* and *Samson Agonistes*, and his reflection of seventeenth century obstetrics and anticipation of modern chaos theory in *Paradise Lost*. In their sometimes complementary, sometimes contradictory and consistently interrogative views of Milton and his work, these essays offer an arena of conflict for future
