Sir John Soane? Influence on Architecture from 1791 Oliver Bradbury, 2017-07-05 Sir John Soane's Influence on Architecture from 1791 A Continuing Legacy is the first in depth study of this eighteenth century British architect's impact on the work of others extending globally and still indeed the case over 200 years later. Author Oliver Bradbury presents a compelling argument that the influence of Soane 1753-1837 has persevered through the centuries rather than waning around the time of his death. Through examinations of internationally renowned architects from Benjamin Henry Latrobe to Philip Johnson as well as a number of not so well known Soanean disciples Bradbury posits that Soane is perhaps second only to Palladio in terms of the longevity of his influence on architecture through the course of more than two centuries from the early 1790s to today, concluding with the recent return to pure revivalism. Previous investigations have been limited to focusing on Soane's late Georgian and then post modern influence; this is the first in depth study of his impact over the course of two centuries. Through this survey Bradbury demonstrates that Soane's influence has been truly international in the pre modern era, reaching throughout the British Isles and beyond to North America and even colonial Australia. Through his inclusion of select detailed case studies Bradbury contends that Soane's is a continuing not negated legacy in architecture.

Encyclopedia of Interior Design Joanna Banham,1997-05 First published in 1997 Routledge is an imprint of Taylor Francis an informa company *The Environmental Imagination* Dean Hawkes,2019-11-07 The Environmental Imagination explores the relationship between tectonics and poetics in environmental design in architecture Working thematically and chronologically from the eighteenth century to the present day this book redefines the historiography of environmental design by looking beyond conventional histories to argue that the environments within buildings are a collaboration between poetic intentions and technical means In a sequence of essays the book traces a line through works by leading architects of the nineteenth and twentieth centuries that illustrate the impact of new technologies on the conception and realisation of environments in buildings In this a consideration of the qualitative dimension of environment is added to the primarily technological narratives of other accounts In this second edition the book has been substantially rewritten and restructured to include further research conducted in the decade since the first edition A number of important buildings have been revisited in order to extend the descriptions of their environments and studies have been made of a number of newly studied significant buildings A completely new essay offers an environmental interpretation of Luis Barrag n s magical own house in Mexico City and the earlier studies of buildings by Peter Zumthor have been gathered into a single extended essay that includes a body of new research On the fiftieth anniversary of the publication of Reyner Banham s *The Architecture of the Well tempered Environment* the book concludes with a critical tribute to that seminal text *The Environmental Imagination* will appeal to academics and practitioners with interests in the history theory and technology of architecture The Emergence of the Professional Watercolourist Greg Smith,2018-01-12 This title was first published in 2002 Draw ing on extensive primary research Greg Smith describes the shifting cultural identities of the English watercolour and the English watercolourist at the end of the eighteenth and the beginning of the nineteenth century His convincing narrative of the conflicts and alliances that marked the history of the medium and its practitioners during this period includes careful detail about the broader artistic context within which watercolours were produced acquired and discussed Smith calls into question many of the received assumptions about the history of watercolour painting His account exposes the unsatisfactory nature of the traditional narrative of watercolour painting s development into a high art form which has tended to offer a celebratory focus on the innovations and genius of individual practitioners such as Turner and Girtin rather than detailing the anxieties and aspirations that characterized the ambivalent status of the watercolourist *The Emergence of the Professional*

The Picturesque John Macarthur, 2013-03-07 In this fresh and authoritative account John Macarthur presents the eighteenth century idea of the picturesque when it was a risky term concerned with a refined taste for everyday things such as the hovels of the labouring poor in the light of its reception and effects in modern culture In a series of linked essays Macarthur shows what the concept of picture does in the picturesque and how this relates to modern theories of the image how the distaste that might be felt today at the sentimentality of the picturesque was already at play in the eighteenth century how visual values such as irregularity become the basis of modern architectural planning how the concept of appropriating a view moves from landscape design into urban design why movement is fundamental to picturing the stillness of buildings cities and landscapes Drawing on examples from architecture art and broader culture John Macarthur s account of this key topic in cultural history

makes engaging reading for all those studying architecture art history cultural history or visual studies The Idea of the Cottage in English Architecture, 1760 - 1860 Daniel Maudlin, 2015-07-24 The Idea of the Cottage in English Architecture is a history of the late Georgian phenomenon of the architect designed cottage and the architectural discourse that articulated it It is a study of small buildings built on country estates and not so small buildings built in picturesque rural settings resort towns and suburban developments At the heart of the English idea of the cottage is the Classical notion of retreat from the city to the countryside This idea was adopted and adapted by the Augustan infused culture of eighteenth century England where it gained popularity with writers artists architects and their wealthy patrons who from the later eighteenth century commissioned retreats gate lodges estate workers housing and seaside villas designed to appear as cottages The enthusiasm for cottages within polite society did not last By the mid nineteenth century cottage related building and book publishing had slowed and the idea of the cottage itself was eventually lost beneath the Tudor barge boards and decorative chimneystacks of the Historic Revival And yet while both designer and consumer have changed over time the idea of the cottage as the ideal rural retreat continues to resonate through English architecture and English culture **The Ruins of the Most Beautiful Monuments of Greece** David Le Roy, 2004 The striking engravings of Julien David Le Roy s The Ruins of the Most Beautiful Monuments of Greece 1758 first revealed the architectural wonders of ancient Athens to the West Part architectural theory part archaeological report part travelogue the greatly expanded edition of 1770 here translated into English is entirely original in its understanding of the spirit of classical Greek architecture and in its influence on the direction of contemporary architectural creation Book jacket *Architectural Drawings* Dr. Frances Sands, 2021-08-05 A visual large format compilation of some of the finest architectural drawings from Sir John Soane s extensive collection Architectural Drawings casts light on the magnificent architectural drawings of neo classical architect teacher and collector Sir John Soane that are otherwise concealed in archives This book featuring artworks handpicked from what was probably the first comprehensive collection of architectural drawings in the world numbering 30 000 at the time of his death in 1837 celebrates a life spent procuring curiosities The collection encompasses the hands of Montano Thorpe Wren Talman Hawksmoor Vanbrugh Gibbs Kent Chambers Adam Cl risseau P cheux Wyatt Playfair Nash and of course Soane himself The quality of Soane s collection of drawings is scarcely paralleled elsewhere and on account of their fragility these items are infrequently seen by the public This innovative book draws together the most exquisite and important works from the collection for the first time showing the extraordinary connoisseurship of Sir John Soane while also exploring what drove Soane to amass such a collection and the provenance of his various significant acquisitions This book illustrates the story of Soane as a collector of architectural drawings but a story which is not normally available to the public and will provide a sumptuous opportunity to peruse some of the finest architectural drawings in existence Framing Formalism Richard Woodfield, 2013-10-23 Alois Riegl 1858 1905 was one of the founding fathers of modern formalist criticism As a member of the Vienna School of Art Historians he shared

their range of interests in the decorative arts art in transition conservation and monuments This collection of critical essays examines various facets of Riegl's work and opens with a new translation of Hans Sedlmayr's famous and notorious *Die Quintessenze der Lehren Riegls* Included is Julius von Schlosser's assessment of Riegl's contribution to the Vienna School of Art Historians as well as essays by a team of international scholars This book offers a re engagement with the ideas of one of the most important and neglected art historians of the 20th century

The Architecture of Ruins Jonathan Hill, 2019-03-25 *The Architecture of Ruins* Designs on the Past Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty first century in which a building is designed occupied and imagined as a ruin This design practice conceives a monument and a ruin as creative interdependent and simultaneous themes within a single building dialectic addressing temporal and environmental questions in poetic psychological and practical terms and stimulating questions of personal and national identity nature and culture weather and climate permanence and impermanence and life and death Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past the present and the future in a single architecture Structured around a collection of biographies this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones the chapters investigate an evolving interdisciplinary design practice to show the relevance of historical understanding to design Like a history a design is a reinterpretation of the past that is meaningful to the present Equally a design is equivalent to a fiction convincing users to suspend disbelief We expect a history or a novel to be written in words but they can also be delineated in drawing cast in concrete or seeded in soil The architect is a physical novelist as well as a physical historian Like building sites ruins are full of potential In revealing not only what is lost but also what is incomplete a ruin suggests the future as well as the past As a stimulus to the imagination a ruin's incomplete and broken forms expand architecture's allegorical and metaphorical capacity indicating that a building can remain unfinished literally and in the imagination focusing attention on the creativity of users as well as architects Emphasising the symbiotic relations between nature and culture a building designed occupied and imagined as a ruin acknowledges the coproduction of multiple authors whether human non human or atmospheric and is an appropriate model for architecture in an era of increasing climate change

Sir John Soane and the Country Estate Ptolemy Dean, 2019-07-05 First published in 1999 this volume examines Sir John Soane 1753 1837 who was one of Britain's most inventive architects His achievements include the Bank of England and the world's first picture gallery at Dulwich buildings of international importance His country estate work inspired by classical antiquity ranges in scale from the remodelling of existing country houses such as Wimpole Hall in Cambridgeshire and Aynhoe Park in Northamptonshire to simple outbuildings Here we see the emergence of the key themes of his style and the results of his precise attention to

proportion design detail and light and shade These are among Soane s finest works Making full use of the Soane Museum and country house archives Ptolemy Dean here examines ten country house projects reconstructing the creative transactions between client and architect architect and skilled craftsman It is impossible to understand Soane s intentions without the drawings sketches and letters which enable us to trace the process of design With the author s own drawings in watercolour to illustrate Soane s use of light and space and beautiful photographs by Martin Charles Sir John Soane and the Country Estate offers an enthralling insight into the work of a great architect An illustrated inventory the first fully researched guide to Soane s country house practice details an architectural legacy that has rarely been matched

Morality and Architecture Revisited David Watkin,2001-08 When *Morality and Architecture* was first published in 1977 it received passionate praise and equally passionate criticism An editorial in *Apollo* entitled *The Time Bomb* claimed that it deserved to become a set book in art school and University art history departments and the *Times Literary Supplement* savaged it as an example of that kind of vindictiveness of which only Christians seem capable Here for the first time is the story of the book s impact In writing his groundbreaking polemic David Watkin had taken on the entire modernist establishment tracing it back to Pugin Viollet le Duc Corbusier and others who claimed that their chosen style had to be truthful and rational reflecting society s needs Any critic of this style was considered antisocial and immoral Only covertly did the giants of the architectural establishment support the author Watkin gives an overview of what has happened since the book s publication arguing that many of the old fallacies still persist This return to the attack is a revelation for anyone concerned architecture s past and future *Morality and Architecture Revisited* contains the entire text of the book *Morality and Architecture* plus additional material by David Wakin on the controversy that the the book created

Weather Architecture Jonathan Hill,2013-06-17 *Weather Architecture* further extends Jonathan Hill s investigation of authorship by recognising the creativity of the weather At a time when environmental awareness is of growing relevance the overriding aim is to understand a history of architecture as a history of weather and thus to consider the weather as an architectural author that affects design construction and use in a creative dialogue with other authors such as the architect and user Environmental discussions in architecture tend to focus on the practical or the poetic but here they are considered together Rather than investigate architecture s relations to the weather in isolation they are integrated into a wider discussion of cultural and social influences on architecture The analysis of weather s effects on the design and experience of specific buildings and gardens is interwoven with a historical survey of changing attitudes to the weather in the arts sciences and society leading to a critical re evaluation of contemporary responses to climate change

Shadow-Makers Stephen Kite,2017-10-19 The making of shadows is an act as old as architecture itself From the gloom of the medieval hearth through to the masterworks of modernism shadows have been an essential yet neglected presence in architectural history *Shadow Makers* tells for the first time the history of shadows in architecture It weaves together a rich narrative combining close readings of significant buildings both ancient and modern

with architectural theory and art history to reveal the key places and moments where shadows shaped architecture in distinctive and dynamic ways It shows how shadows are used as an architectural instrument of form composition and visual effect while also exploring the deeper cultural context tracing differing conceptions of their meaning and symbolism whether as places of refuge devotion terror occult practice sublime experience or as metaphors of the unconscious Within a chronological framework encompassing medieval baroque enlightenment sublime picturesque and modernist movements a wide range of topics are explored from Hawksmoor's London churches Japanese temple complexes and the shade patterns of Islamic cities to Ruskin in Venice and Aldo Rossi and Louis Kahn in the 20th century This beautifully illustrated study seeks to understand the work of these shadow makers through their drawings their writings and through the masterpieces they built
