Six Lectures On Sound And Meaning:

Six Lectures on Sound and Meaning Roman Jakobson, 1978 **Six Lectures on Sound and Meaning** Roman Jakobson, 1978
Jakobson, 1978 *Six Lectures on Sound and Meaning* Roman Jakobson, John Mepham, Claude Lévi-Strauss, 1981 Preface by C Levi Strauss **Structures of Language: Notes Towards a Systematic Investigation** Joan Casser, 2022-11-14 This annotated commentary delineating Michel P cheux s materialist discourse theory anticipates the formation of a real social science to supersede the metaphysical meanings always already there instituted by empirical ideology Structures of Language presents P cheux s consequential work in respect of Ferdinand de Saussure s epistemological breakthrough that founded the science of linguistics the theoretical separation of sound from meaning Noam Chomsky s generative grammar John Searle s philosophy of language B F Skinner s indwelling agents J L Austin s speech situations Jacques Lacan s symbolic order and other influential linguistic researchers are cited to explain imaginary semantic systems The broader implications for structural metaphysics in language use are tacitly conveyed *The Spoken Word and the Work of Interpretation* Dennis Tedlock, 2011-06-03 Dennis Tedlock presents startling new methods for transcribing translating and interpreting oral performance that carry wide implications for all areas of the spoken arts Moreover he reveals how the categories and concepts of poetics and hermeneutics based in Western literary traditions cannot be carried over in their entirety to the spoken arts of other cultures but require extensive reevaluation *The Logic of the Living Present* Anna-Teresa Tymieniecka, 1994-12-31 Some might ask Why Locke s theory of knowledge now Though appreciated for his social philosophy Locke has been criticized for his work in the field of epistemology ever since the publication of the Essay It is even as if Locke serves only as an example of how not to think When people criticize Locke they usually cite the hostile commen taries of Berkeley Kant Husserl or Sellars But one might ask are they not all so eager to show the excellence of their own epistemo logical views that they distort and underestimate Locke s thought Russell aptly noted in his History of Western Philosophy that No one has yet succeeded in inventing a philosophy at once credible and self consis tent Locke aimed at credibility and achieved it at the expense of consistency Most of the great philosophers have done the opposite A philosophy which is not self consis tent cannot be wholly true but a philosophy which is self consistent can very well be wholly false The most fruitful philosophies have contained glaring inconsistencies but for that very reason have been partially true There is no reason to suppose that a self consistent system contains more truth than one which like Locke s is obviously more or less wrong B Russell A History of Western Philosophy New York Simon and Schuster 1945 p 613 Here Russell is uncommonly charitable with Locke **The Cambridge Companion to Saussure** Carol Sanders, 2004-12-02 Publisher Description **History of Linguistics 2021** Savina Raynaud, Maria Paola Tenchini, Enrica Galazzi, 2024-11-15 This volume comprises two invited talks and fifteen selected papers chosen from over 200 submissions to the 15th International Conference on the History of Language Sciences ICHoLS XV Originally scheduled to be held in Milan in 2020 the conference was postponed and moved

online due to the COVID 19 pandemic Held from August 23 27 2021 it connected scholars from 30 countries across various time zones The volume is divided into three parts The first part devoted to General and Particular Issues in the History of Linguistics recalls classical authors in relation to contemporary ones as well as newly established disciplines and subtle epistemological inquiries The second part Antiquity mainly investigates the Sanskrit language and various descriptive and didactic studies approached from both ancient and contemporary metalinguistic frameworks The third part deals with Sixteenth to Twentieth Century Works ranging from the Tamil language to American archives and from experimental phonostylistics to the history of monosemy

Semiotics and City Poetics Mary Coghill, 2022-12-05 Roman Jakobson stands alone in his semiotic theory of poetic analysis which combines semiotics linguistics and structuralist poetics This groundbreaking book proposes methods for developing Jakobson's theories of communication and poetic function It provides an extensive range of examples of the kinds of Formalist praxis that have been neglected in recent years developing them for the analysis of all poetry but especially the poetry of our urban future Throughout the book the parameters of a city poetic genre are proposed and established the book also develops the theory of the function of shifters and deixis with special reference to women as narrators It also instantiates an experimental poetic praxis based on the work of one of Jakobson's great influences Charles Sanders Peirce Steadfastly adhering to the text in itself this volume reveals the often surprising hitherto unconsidered structural and semiotic patterns within poems as a whole

Phonological Studies Roman Jakobson, 2012-01-02 No detailed description available for *Phonological Studies* *Sonic Persuasion* Greg Goodale, 2011-04-01 *Sonic Persuasion* Reading Sound in the Recorded Age critically analyzes a range of sounds on vocal and musical recordings on the radio in film and in cartoons to show how sounds are used to persuade in subtle ways Greg Goodale explains how and to what effect sounds can be read like an aural text demonstrating this method

by examining important audio cues such as dialect pausing and accent in presidential recordings at the turn of the twentieth century Goodale also shows how clocks locomotives and machinery are utilized in film and literature to represent frustration and anxiety about modernity and how race and other forms of identity came to be represented by sound during the interwar period In highlighting common sounds of industry and war in popular media Sonic Persuasion also demonstrates how programming producers and governmental agencies employed sound to evoke a sense of fear in listeners Goodale provides important links to other senses especially the visual to give fuller meaning to interpretations of identity culture and history in sound

Audible Geographies in Latin America Dylan Lamar Robbins,2019-09-28 Audible Geographies in Latin America examines the audibility of place as a racialized phenomenon It argues that place is not just a geographical or political notion but also a sensorial one shaped by the specific profile of the senses engaged through different media Through a series of cases the book examines racialized listening criteria and practices in the formation of ideas about place at exemplary moments between the 1890s and the 1960s Through a discussion of Louis Moreau Gottschalk's last concerts in Rio de Janeiro and a contemporary sound installation involving telegraphs by Otávio Schipper and Sérgio Krakowski Chapter 1 proposes a link between a sensorial economy and a political economy for which the racialized and commodified body serves as an essential feature of its operation Chapter 2 analyzes resonance as a racialized concept through an examination of phonograph demonstrations in Rio de Janeiro and research on dancing manias and hypnosis in Salvador da Bahia in the 1890s Chapter 3 studies voice and speech as racialized movements informed by criminology and the proscriptive norms defining white Spanish in Cuba Chapter 4 unpacks conflicting listening criteria for an optics of blackness in national sounds developed according to a gendered set of premises that moved freely between diaspora and empire national territory and the fraught politics of recorded versus performed music in the early 1930s Chapter 5 in the context of Cuban Revolutionary cinema of the 1960s explores the different facets of noise both as a racialized and socially relevant sense of sound and as a feature and consequence of different reproduction and transmission technologies Overall the book argues that these and related instances reveal how sound and listening have played more prominent roles than previously acknowledged in place making in the specific multi ethnic colonial contexts characterized by diasporic populations in Latin America and the Caribbean

Sonic Experience Jean-François Augoyard,Henri Torgue,2006-04-05 Never before has the everyday soundtrack of urban space been so cacophonous Since the 1970s sound researchers have attempted to classify noise music and everyday sounds using concepts such as Pierre Schafer's sound object and R Murray Schafer's soundscape Recently the most significant team of soundscape researchers in the world has been concerned with the effects of sounds on listeners
