Environmental Politics and Liberation in Contemporary Africa M.A. Salih, 2013-03-14 Nowadays the environment looms large in the analysis of conflict in developing societies and the precise role it plays is the subject of an ongoing debate The debate has moved on from the earlier but still popular notions of power struggles class struggles and ethnic conflicts to a perception of conflict as the product of intense group competition for resources Where the state controls the distribution of resources itself inevitably becomes party to conflicts whose bone of contention is access to state power as the most efficient means of gaining access to resources The resources in question are social health education transportation communication recreation etc and material land water housing jobs contracts licenses permits etc In parts of the world and especially in Africa diminishing resources and authoritarian state rule exacerbate group competition leading to political confrontation This is the line I have followed in analysing conflict in the Horn of Africa Markakis 1987 1998 Mohamed Salih's first contribution in this volume is to move the debate a step beyond this line which can be criticized as unduly materialist He does it by bringing culture into the realm of resources not only as a resource in itself but also as the agency that assigns natural resources their value Culture thus becomes a contextual element in conflict over resources whose value is culturally determined
