Sleeping And Waking:

Sleeping and Waking Disorders Christian Guilleminault, 1982 **The Neural Control of Sleep and Waking** Jerome Siegel, 2002-10 Why we need to sleep is not actually known but it is a topic that continues to intrigue us and it is still very much the subject of active research The author takes an historical approach to the subject and hence largely takes a chronological view of sleep research and the scientists ideas and their experiments Parts one and two describe the main historical figures and their various theories and discoveries Part three describes our current state of knowledge of sleep arousal and waking It discusses sleep and waking disorders and discusses the current theories behind the function of sleep This is a book readable by anyone who has some introductory biology or psychology and has an interest in why and how we sleep it will also make an excellent book for anyone taking a course on the physiology and functions of sleep **Sleeping to Dream and Dreaming to Wake Up!** Vijay Srinath Kanchi, 2022-11-08 Dreams play a significant role in our life meaningfully affecting us in the development of our personality and our spiritual journey They are an everyday experience for any human being Dreams have always been of great interest to poets and philosophers alike since ancient times and examples are aplenty in Indian and Western scriptures However it is an uphill task for an ordinary person to fully appreciate the intricacies and significance of dreams in the day to day life It is here that this book proves as an invaluable guide providing deep understanding on the nature of dream and sleep This book is a repertoire of human wisdom gathered for centuries and attested by the modern science offering enormous insights into our dream and deep sleep states It asks from a common man s point of view many a question that perturb us and provides answers to them from the scientific and spiritual perspectives in a captivating way Some such questions include Do we see dreams in black and white or in colour What does a visually challenged person see in his dreams Why are some of our dreams extraordinarily vivid with electric colours the clarity and brilliance of which we may never encounter in our ordinary waking lives Why are we non reflective irrational in our dreams Are the dream time and waking time equal How does our memory work in dream state Why do we forget our dreams and is it possible to improve dream recall and cultivate awareness in dreams Why do we fail to distinguish a dream object from the physical world object while we are dreaming If the dream experience exactly feels like the real world and we fail to distinguish it from the waking world while we are dreaming how can we be certain that we are not dreaming now How does a dream contain various persons exhibiting opposite emotions at the same time when all the dream characters including the witnessing dreamer are produced out of single mind of the dreaming person Can we intentionally transform the dream scenarios If so what would be the philosophical implications of it Can dreams and sleeps be utilized for spiritual elevation and many more questions we always wondered about the daily eight hours of our bed time but never got the right answers to We find new meanings and ways in dealing with our dreams in this volume therefore it is a must read for every dream enthusiast as well as any serious spiritual seeker **Awakening and Sleep-wake Cycle Across Development** Piero

Salzarulo, Gianluca Ficca, 2002-01-01 Sleep and wakefulness undergo important changes with age. Awakening a crucial event in the sleep wake rhythm is a transition implying complex physiological mechanisms. Its involvement in sleep disturbances is also well known. This collective volume is the first attempt to systematically approach awakening across development. A methodological section considers criteria to define awakening in a developmental perspective. Theoretical considerations on development of wakefulness and on its relation to consciousness are included and provide a vigorous impulse to go beyond present criteria and classifications. Age changes are the core of studies on development; a section of the book examines old and new data from preterm to infants up to children, underscoring the main turning points along this developmental path. As for other aspects of development, awakening and the sleep wake cycle are also influenced by external factors, both physical and human. Several contributions deal with this topic in particular, focusing on the parent-infant interaction and the influences of culture. Clinical contexts offer an opportunity to show both quantitative and qualitative changes of awakening and arousals in different pathological conditions. Either partial changes of one physiological variable or global and massive changes can be observed. Series B

The Origins, Prevention and Treatment of Infant Crying and Sleeping Problems Ian St James-Roberts, 2013-07-03 Babies who cry a lot or are unsettled in the night are common sources of concern for parents and consequently costly problems for health services. In this book Ian St James Roberts summarises the evidence concerning infant crying and sleeping problems to provide a new evidence based approach to these common challenges for parents and health services. The book begins by distinguishing between infant and parental parts of the problems and provides guidelines for assessing each issue. Topics covered include the pros and cons of infant demand versus limit setting, forms of parenting, causes of infant colicky crying and night waking, effects of night time separations on infant attachments, interventions such as swaddling, herbal remedies and controlled crying. Since there is now firm evidence that parents' vulnerabilities and cultural backgrounds affect how problems are defined and guidance is acted upon, and that parents who wish to do so can reduce infant crying and unsettled night waking, social factors are considered alongside medical issues. Translating research evidence into practical tools and guidance. *The Origins, Prevention and Treatment of Infant Crying and Sleeping Problems* will be essential reading for a wide range of healthcare professionals including mental health staff, social workers, midwives, health visitors, community physicians and paediatricians. *Sleeping and Waking* Ian Oswald, 1962
