Courts, Justice, and Efficiency Hector Fix-Fierro, 2004-01-06 This study explores the socio legal context of economic rationality in the legal and judicial systems It examines the meaning and relevance of the concept of efficiency for the operation of courts and court systems seeking to answer questions such as in what sense can we say that the adjudicative process works efficiently What are the relevant criteria for the measurement and assessment of court efficiency Should the courts try to operate efficiently and to what extent is this viable What is the proper relationship between efficiency and justice considerations in a judicial proceeding To answer these questions a conceptual framework is developed on the basis of empirical studies and surveys carried out mainly in the United States Western Europe and Latin America Two basic ideas emerge from it First economic rationality has penetrated the legal and judicial systems at all levels and dimensions from the level of society as a whole to the day to day operation of the courts from the institutional dimension of adjudication to the organizational context of judicial decisions Far from being an alien value in the judicial process efficiency has become an inseparable part of the structure of expectations we place on the legal system Second economic rationality is not the prevalent value in legal decision making as it is subject to all kinds of constraints local conditions and concrete negotiations with other values and interests **Comparative Civil Procedure** Margaret Y.K. The Transformation of Enforcement Hans-W. Micklitz, Andrea Wechsler, 2016-04-07 This insightful book considers the

phenomenon of the transformation of enforcement in European economic law while adopting a distinct global perspective. The editors identify and respond to the need for reflection on transformation processes in the area of enforcement by bringing together the leading international and European scholars in a variety of disciplines to share and compare experiences and learning in different areas of law. Rooted in a wide and regulatory understanding of enforcement, this book showcases the transformation of enforcement with reference to both European economic law especially transnational commercial law, competition law, intellectual property law, consumer law, and to the current context of significant global economic challenges. Comparative perspectives facilitate the formation of a holistic perspective on enforcement that reaches beyond distinct theoretical accounts, political agendas, regulatory systems, institutional patterns, particular remedies, industry sectors, and stakeholder perspectives. As the first comprehensive and comparative analysis of the enforcement of European economic law that reaches beyond closely confined areas of law, it constitutes a crucial contribution to the theoretical and policy questions of how to design a coherent European enforcement architecture in accordance with essential principles and objectives of the EU economic order. This unique study will have broad appeal. By exploring enforcement transformations from a legal and a cross disciplinary perspective, it will be essential reading for scholars, practitioners, and policymakers from different disciplines.

Consumer ADR in Europe Christopher Hodges, Iris Benöhr, Naomi Creutzfeldt, 2012-05-10. This is the first systematic comparative study into how consumer ADR systems usually ombudsmen and mediators work, the differing national architectures within which they operate, and how they can be improved. It describes ADR schemes in Belgium, France, Germany, Lithuania, the Netherlands, Poland, Slovenia, Spain, Sweden, and the United Kingdom, as well as emerging pan-EU dispute resolution schemes. Use of the techniques of mediation, conciliation, and adjudication are noted. It also covers EU measures on consumer ADR and 2011 proposals for legislation on ADR and ODR. Data on volumes, cost, and duration of ADR schemes are compared both between different systems and with courts. The authors' findings underpin EU and national developments and outline options for future policy. Findings and proposals are included for the functions, scope, performance, essential requirements, architecture, and operation of ADR systems. The relationships between ADR courts and regulators are discussed, and need for reforms are noted. This is a ground-breaking work that will have a major impact on European legal systems. This title is included in Bloomsbury Professional's International Arbitration online service. *Staff Studies: Small claims courts* National Institute for Consumer Justice, 1972. *Speak English or What?* Philipp Sebastian Angermeyer, 2015-04-01.
