Electrical and Electronic Engineering at Kinneret and Ort Braude Engineering Colleges **Computational Intelligence in Data Mining - Volume 3** Lakhmi C. Jain, Himansu Sekhar Behera, Jyotsna Kumar Mandal, Durga Prasad

Mohapatra, 2014-12-11 The contributed volume aims to explicate and address the difficulties and challenges for the seamless integration of two core disciplines of computer science i.e. computational intelligence and data mining. Data Mining aims at the automatic discovery of underlying non-trivial knowledge from datasets by applying intelligent analysis techniques. The interest in this research area has experienced a considerable growth in the last years due to two key factors: a knowledge hidden in organizations' databases can be exploited to improve strategic and managerial decision making; b) the large volume of data managed by organizations makes it impossible to carry out a manual analysis. The book addresses different methods and techniques of integration for enhancing the overall goal of data mining. The book helps to disseminate the knowledge about some innovative active research directions in the field of data mining machine and computational intelligence along with some current issues and applications of related topics. Handbook on Advancements in Smart Antenna Technologies for Wireless Networks Sun, Chen, Cheng, Jun, Ohira, Takashi, 2008-07-31 Provides information on smart antenna technologies featuring contributions with in-depth descriptions of terminologies, concepts, methods, and applications related to smart antennas in various wireless systems **Applied Science & Technology Index**, 1997 *PIMRC 2002*, 2002 *Introduction to Smart Antennas* Constantine A. Balanis, Panayiotis I. Ioannides, 2007 As the growing demand for mobile communications is constantly increasing, the need for better coverage, improved capacity, and higher transmission quality rises. Thus, a more efficient use of the radio spectrum is required. Smart antenna systems are capable of efficiently utilizing the radio spectrum and is a promise for an effective solution to the present wireless systems problems while achieving reliable and robust high-speed high data rate transmission. The purpose of this book is to provide the reader a broad view of the system aspects of smart antennas. In fact, smart antenna systems comprise several critical areas such as individual antenna array design, signal processing algorithms, space-time processing, wireless channel modeling and coding, and network performance. In this book, we include an overview of smart antenna concepts, introduce some of the areas that impact smart antennas, and examine the influence of interaction and integration of these areas to Mobile Ad Hoc Networks. In addition, the general principles and major benefits of using space-time processing are introduced, especially employing multiple input multiple output (MIMO) techniques. **Smart Antennas** T. K.
