During the cold war, geography played a major role in the relationships between the US and the USSR in several areas. Containment used by the US to try and stop the expansion of communism to other countries. They did this by providing economic aid to Western Europe under the Marshal Plan, making military alliances with Western Europe (NATO) and Southeast Asia (SEATO) .Also support in countries like South Korea, Vietnam, and Afghanistan.

Spheres of Influence – an area of special interest and is politically and economically active. The USSR saw Eastern Europe as such a sphere, which it set up a number of puppet communist governments in order to create a buffer zone between itself and Western Europe. The USA sees the Western Hemisphere as it's sphere of influence.

Space – the competition between the USA and the Soviet Union during the cold war led to the race to the moon, and accomplishments in space represented the superiority of one ideology over another.
