Soviet Submarines Design Development And Tactics:

Soviet Submarines Jan S. Breemer, 1989 Airborne Maritime Surveillance in the North Atlantic John O.

Birkeland, 2025-07-17 This book offers a comprehensive examination of historical Norwegian and allied airborne maritime surveillance operations in the North Atlantic after World War II until the present. Russia's resurgent naval and submarine activity in the High North needs to be closely observed. Norway together with her closest allies have monitored such activity in the High North since the end of World War II. One of the key instruments in that effort has been Maritime Patrol Aircraft MPA with their Anti Submarine Warfare ASW capabilities. However, after the Cold War, in many nations an atrophy took place within the MPA communities of knowledge, resources, and experience with airborne ASW. This occurred just as the concept of intelligence surveillance and reconnaissance ISR came to play an increasingly important role in modern warfare, but without sufficient attention being paid to the specific challenges of maritime airborne surveillance and reconnaissance. This book addresses that gap and examines the entwined evolution of airborne maritime surveillance by MPA and ASW in the High North both during and after the Cold War, with the main focus being on Norway. The discussion identifies the fundamental building blocks of these historical surveillance operations through a portrayal of the development of airborne surveillance and reconnaissance operations. These building blocks are then applied to make recommendations for the future for maritime surveillance in the High North. This book will be of much interest to students of naval history, strategic studies, intelligence studies, Nordic studies, and International Relations.

The Submariner's Dictionary Or Submariner's Compendium of Terms & Tar's Handbook of Naval Verbiage and Retired Guy's Re-familiarization Manual Ron Martini, 2005

Submariners are a tight knit group of men bound together by training and experience and with a language all their own. That language is perhaps a little vulgar but never intentionally demeaning and a little irreverent but still worldly. This work is an attempt to preserve and explain some of these curious guys who so proudly wear a shiny metal pin that looks like a strange pair of fish on their left breast. This process of accumulating this new language begins in Boot Camp and is added to with every change of duty station the sailor undergoes. It is heard aboard the boats and unknowingly by family members who can't understand terms like head deck and overhead and who think SOS is a distress signal.

The article index includes all articles in

all issues of Naval Submarine League's Submarine Review and Naval Institute's Naval Proceedings magazine There are Web sites and other Internet sources listed and even information on obtaining more information through the Freedom of Information Act Also included is how to find materials inside government archives Collected and edited by a former U S submariner and member of U S Submarine Veterans Inc American Sea Power and the Obsolescence of Capital Ship Theory R.B. Watts,2015-11-27 Since the beginning of the 20th century the United States has sought to achieve Admiral Alfred Thayer Mahan's vision of command of the sea using large battle fleets of capital ships This strategy has been generally successful no force can oppose the U S Navy on the open seas Yet capital ship theory has become increasingly irrelevant Globally irregular warfare dominates the spectrum of conflict especially in the aftermath of 9 11 Fleet engagements are a thing of the past and even small scale missions that rely on capital ships are challenged by irregular warfare In a pattern evident since World War II the U S Navy has attempted to adapt its capital ship theory to irregular conflicts with mixed results before returning to traditional operations with little or no strategic debate This book discusses the challenges of irregular warfare in the 21st century and the need for U S naval power to develop a new strategic paradigm *Department of Defense appropriations for 1985* United States. Congress. House. Committee on Appropriations. Subcommittee on Department of Defense,1984 **The Deadly Deep** Iain Ballantyne,2018-12-04 A fascinating and comprehensive account of how an initially ineffectual underwater boat originally derided and loathed in equal measure evolved into the most powerful and terrifying vessel ever invented with enough destructive power to end all life on Earth Iain Ballantyne considers the key episodes of submarine warfare and vividly describes the stories of brave individuals who have risked their lives under the sea often with fatal consequences His analysis of underwater conflict begins with Archimedes discovering the Principle of Buoyancy Our clandestine journey then moves through the centuries and focuses on prolific characters with deathly motives including David Bushnell who in 1775 in America devised the first combat submarine with the idea of attacking the British Today nuclear powered submarines are among the most complex costly ships in existence Armed with nuclear weapons they have the ability to destroy millions of lives they are the most powerful warships ever created At the heart of this thrilling narrative lurks danger and power as we discover warfare's murkiest secrets *One Hundred Years of Sea Power* George W. Baer,1994-08-01 A navy is a state's main instrument of maritime force What it should do what doctrine it holds what ships it deploys and how it fights are determined by practical political and military choices in relation to national needs Choices are made according to the state's goals perceived threat maritime opportunity technological capabilities practical experience and not the least the way the sea service defines itself and its way of war This book is a history of the modern U S Navy It explains how the Navy in the century after 1890 was formed and reformed in the interaction of purpose experience and doctrine **Department of Defense Appropriations** United States. Congress. House. Committee on Appropriations. Subcommittee on Department of Defense,1986
