Travel, Space, Architecture Miodrag Mitrasinovic, 2016-02-17 *Travel Space Architecture* defines a new theoretical territory in architectural and urban scholarship that frames the processes of spatial production

through the notion of travel By aligning architectural thinking with current critical theory debates this book explores whether dissociating culture from place and identity and detaching the idea of architecture from both can reframe our understanding of spatial and architectural practices The book presents seventeen key case studies from a diverse range of perspectives including historical theoretical and praxis based and range from interrogations of architectural travel and notions of belonging and nationhood to challenging established geopolitical hierarchies *Gender Space Architecture* Iain

Borden, Barbara Penner, Jane Rendell, 2002-09-11 This significant reader brings together for the first time the most important essays concerning the intersecting subjects of gender space and architecture Carefully structured and with numerous introductory essays it guides the reader through theoretical and multi disciplinary texts to direct considerations of gender in relation to particular architectural sites projects and ideas This collection marks a seminal point in gender and architecture both summarizing core debates and pointing toward new directions and discussions for the future Domestic Architecture

and the Use of Space Susan Kent, 1993-06-25 Domestic Architecture and the Use of Space investigates the relationship between the built environment and the organisation of space The contributors are classical and prehistoric archaeologists anthropologists and architects who from their different backgrounds are able to provide some important and original insights into this relationship *Disability, Space, Architecture: A Reader* Jos Boys, 2017-02-17 Disability Space Architecture A

Reader takes a groundbreaking approach to exploring the interconnections between disability architecture and cities The contributions come from architecture geography anthropology health studies English language and literature rhetoric and composition art history disability studies and disability arts and cover personal theoretical and innovative ideas and work Richer approaches to disability beyond regulation and design guidance remain fragmented and difficult to find for architectural and built environment students educators and professionals By bringing together in one place some seminal texts and projects as well as newly commissioned writings readers can engage with disability in unexpected and exciting ways that can vibrantly inform their understandings of architecture and urban design Most crucially Disability Space Architecture A Reader opens up not just disability but also ability dis ability as a means of refusing the normalisation of only particular kinds of bodies in the design of built space It reveals how our everyday social attitudes and practices about people objects and spaces can be better understood through the lens of disability and it suggests how thinking differently about dis ability can enable innovative and new kinds of critical and creative architectural and urban design education and practice

Architecture Olga Bannova, 2021 For many the idea of Space Architecture as a discipline lies in the domain of science fiction

where everything is possible simply because it happens very far in the future Is Space Architecture a fiction or reality This book explores if and how architectural principles and strategies need to be transformed when applied to the extreme conditions of outer space It presents concepts developed by great minds in the fields of space exploration and science fiction ones which can inspire new ways into the future The book also presents the philosophy of Space Architecture arguing for example that the design of space habitats needs to be human centred while defining ways for humans to co exist in new environments These views are complemented by examples of architectures from current and planned space missions organised by private companies as well as government agencies
