Space The Dormant Frontier Changing The Paradigm For The 21st Century:

Space, the Dormant Frontier Joan Johnson-Freese, Roger Handberg, 1997-09-23 Rather than examining only the civil or military side of the US space program as have many books in the past *Space the Dormant Frontier* takes a unique look at the space program as a whole Part of the book's treatise is that the two communities must stop ignoring each other if the US space program is to move forward beyond being a science project jobs program or political football How the program got into its current semi desperate state is also examined as history has given space a legacy once glorious now an albatross The authors include information and analysis on the military and civil space programs challenge the perspective of the Washington Beltway analyst with vested interests in the status quo and make policy recommendations based on realism rather than idealism

Space Edward Lee Hudgins, David Boaz, 2002 In *Space The Free Market Frontier* leading experts analyze how we can move from the current situation of limited access to space and truly make space a place where people can work play and live This book considers how we arrived at our current situation what signs hold the promise of a free market future and which policy changes might enable space to become the next free market frontier

Toward Liberty David Boaz, Edward Lee Hudgins, 2002 *Space* deals with the issues involved in opening space to private travel and more commercial ventures

Reinventing NASA Roger Handberg, 2003-12-30 From its beginnings NASA was convinced that its real mission was to create the opportunity for a much different and better society on Earth namely through human space flight Pursuit of such a goal has led the agency to persist in certain activities even when they conflict with the wishes of Congress and the President Recent changes in the international environment changes that began well before September 11 2001 have brought the military back into the field of human space flight a situation that holds certain hazards for NASA since the military is more powerful politically Dramatic changes could be in store changes that could severely damage NASA's capacity for continuing what it sees as its primary objective While most analyses see the agency as riddled with incompetence Handberg argues that NASA's troubles are a product of its internal values He begins with an historical overview of the major themes in NASA's history followed by chapters on specific areas of concentration such as the space station space transportation space science and internal reforms He also discusses the long term future of the agency and human space flight in general both domestically and internationally

Geopolitics of the Outer Space Bohumil Doboš, 2018-09-25 This book presents a comprehensive geopolitical analysis of European space activities By studying outer space as a physical and socio economic space as well as a military diplomatic area the author helps readers understand outer space as a geopolitical environment The book also offers insights into the behavior and strategies of different actors with a special focus on the European space strategy and the nature of the European space program and diplomacy

Space Enterprise Phillip Harris, 2009-12-29 In *Space Enterprise Living and Working Offworld* Dr Philip Harris provides the vision and rationale as to why humanity is leaving its cradle Earth to use space resources as well as pursuing lunar industrialization

and establishing offworld settlements As a management space psychologist Dr Harris presents a behavioral science perspective on space exploration and enterprise In this his 45th book Phil has completely revised and updated the two previous editions of this classic placing new emphasis on the need for more synergy and participation by the private sector He not only provides a critical review of what is happening in the global space community but offers specific strategies for lunar economic development The author analyzes the human factors in contemporary and future space developments especially relative to the deployment of people aloft This user friendly volume offers numerous photographs diagrams exhibits and case studies

Space Politics and Policy E. Sadeh, 2006-04-11 Space Politics and Policy An Evolutionary Perspective provides a comprehensive survey of Space Policy This book is organized around two themes Space Policy is evolutionary in that it has responded to dramatic political events such as the launching of Sputnik and the Cold War and has undergone dynamic and evolutionary policy changes over the course of the space age Space Policy is an integral part of and interacts with public policy processes in the United States and abroad The book analyzes Space Policy at several levels including historical context political actors and institutions political processes and policy outcomes It examines the symbiotic relationships between policy technology and science provides a review and synthesis of the existing body of knowledge in Space Policy and identifies Space Policy trends and developments from the beginnings of the space age through the current era of the twenty first century

The Militarization and Weaponization of Space Matthew Mowthorpe, 2004-01-01 The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War Satellite reconnaissance navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space Today as the prominence of information technology computing and telecommunications advances so does the concept of space as a battlefield In The Militarization and Weaponization of Space Matthew Mowthorpe diligently analyzes the military space policies of the United States the Soviet Union Russia and the People s Republic of China from the Cold War period to the present day Mowthorpe focuses on the development of the ballistic missile defense and other anti satellite systems and aptly assesses to what degree space will become armed This work cogently addresses an issue of increasing urgency to scholars of international politics

The Viability of U.s. Antisatellite (asat) Policy: moving Toward Space control Joan Johnson-Freese, 2000 This is the 30th volume in the Occasional Paper series of the U S Air Force Institute for National Security Studies INSS It is particularly timely that with the increased emphasis on space within the U S Air Force in light of the ongoing HQ USAF efforts toward air and space integration into a true aerospace force and in the wake of the 1998 INSS conference Spacepower for a New Millennium this work represents the initiation of the Space Policy Series of INSS Occasional Papers In this paper Dr Joan Johnson Freese presents an examination of past U S policy and international treaty interpretations on anti satellite weapons ASAT in space within the context of the organizational politics surrounding questions of developing and deploying these

systems With the ever increasing American commercial and military reliance on space these questions are particularly timely and it is our hope that the debate on ASATs indeed on the larger issues of weaponization of space can be better informed by this paper The Politics of Space Eligar Sadeh,2010-11-01 The pace of space exploration has long been dictated by political motivations This book helps to explain why this is so in the post Cold War era Combining essays a glossary of terms tables and statistics this new title from Routledge comes as a welcome addition to this increasingly popular topic The book covers theories and concepts as well as current issues gives a background to international and national space agencies contains essays that cover military commercial and governmental actors in space politics
