important technical features His study shows that since the end of the Cold War all but a few European navies have significantly decreased in size and thus have ceded important capabilities along the way Based on the understanding of sea power as a prerequisite for political influence and economic health the consequences of the geopolitical shift toward the Asian Pacific region and most importantly the general decline of Europe s traditional naval capabilities the author concludes that the ability of European states to influence events near and abroad by means of their naval forces has atrophied and will continue to be called into question in the future *The Hispanic American Historical Review* James Alexander Robertson,1922 Includes Bibliographical section Spain under the Bourbons, 1700-1833 W.N.Hargreaves-Mawdsley,2016-01-12 *The Histories of Hispanic America* Alva Curtis Wilgus,1932 **Trade and Peace with Old Spain, 1667-1750** Jean O. far rarer phenomenon of hyperpowers those few societies that amassed such extraordinary military and economic might that they essentially dominated the world Now in this sweeping history of globally dominant empires bestselling author Amy Chua explains how hyperpowers rise and why they fall In a series of brilliantly focused chapters Chua examines history s hyperpowers Persia Rome Tang China the Mongols the Dutch the British and the United States and reveals the reasons behind their success as well as the roots of their ultimate demise Chua s unprecedented study reveals a fascinating historical pattern For all their differences she argues every one of these world dominant powers was at least by the standards of its time extraordinarily pluralistic and tolerant Each one succeeded by harnessing the skills and energies of individuals from very different backgrounds and by attracting and exploiting highly talented groups that were excluded in other societies Thus Rome allowed Africans Spaniards and Gauls alike to rise to the highest echelons of power while the barbarian Mongols conquered their vast domains only because they practiced an ethnic and religious tolerance unheard of in their time In contrast Nazi Germany and imperial Japan while wielding great power failed to attain global dominance as a direct result of their racial and religious intolerance But Chua also uncovers a great historical irony in virtually every instance multicultural tolerance eventually sowed the seeds of decline and diversity became a liability triggering conflict hatred and violence The United States is the quintessential example of a power that rose to global dominance through tolerance and diversity The secret to America s success has always been its unsurpassed ability to attract enterprising immigrants Today however concerns about outsourcing and uncontrolled illegal immigration are producing a backlash against our tradition of cultural openness Has America finally reached a tipping point Have we gone too far in the direction of diversity and tolerance to maintain cohesion and unity Will we be overtaken by rising powers like China the EU or even India Chua shows why American power may have already exceeded its limits and why it may be in our interest to retreat from our go it alone approach and promote a new multilateralism in both domestic and foreign affairs

Foundations and American Political Science Emily Hauptmann, 2022-11-01 Foundations in the United States have long exerted considerable power over education and scholarly production Although today s titans of philanthropy proclaim more loudly their desire to transform schools and universities than did some of their predecessors philanthropic programs designed to reshape educational institutions are at least a century old In *Foundations and American Political Science* Emily Hauptmann focuses on the postwar Carnegie Ford and Rockefeller programs that reshaped political science She shows how significant changes in the methods and research interests of postwar political scientists began as responses to the priorities set by their philanthropic patrons Informed by years of research in foundation and university archives *Foundations and American Political Science* follows the course of several streams of private philanthropic money as they wended their way through public universities and political science departments in the postwar period The programs launched by the Carnegie Ford and Rockefeller philanthropies as well as their reception at the universities of California and Michigan steered political scientists towards

particular problems and particular ways of studying them The rise of statistical analyses of survey data the decline of public administration and persistent conflicts over the discipline s purpose and the best methods for understanding politics Hauptmann argues all had their roots in the ways that postwar universities responded to foundations programs Additionally the new emphasis universities placed on sponsored research sparked sharp disputes among political scientists over what should count as legitimate knowledge about politics and what the ultimate purpose of the discipline should be

The Political Systems of Empires Shmuel N. Eisenstadt, 2017-07-31 Winner of the prestigious MacIver Award when it was first published this remains a towering work of modern political sociology especially of macrosociology Its main objective is comparative analysis of political commonalities found in different societies both historical and present The book seeks to find some pattern or laws in the structure and development of such systems The imaginative use of data helps to bring order into what might otherwise be considered a speculative volume The purpose of *The Political Systems of Empires* is to apply sociological concepts to the analysis of historical societies through the comparative analysis of a special type of political system This analysis does not purport to be historical or descriptive Its main objective is comparative analysis of political commonalities found in different societies The book seeks to find some pattern or laws in the structure and development of such systems
