Six Group Therapies S. Long, 2013-06-29 **Comprehensive Handbook of Psychotherapy Integration** George Stricker, Jerold R. progress The book explores the puzzling question why do addiction counselors dedicate themselves to reconciling drug users relationship to language in order to reconfigure their relationship to drugs To answer this question anthropologist Summerson Carr traces the charged interactions between counselors clients and case managers at Fresh Beginnings an addiction treatment program for homeless women in the midwestern United States She shows that shelter food and even the custody of children hang in the balance of everyday therapeutic exchanges such as clinical assessments individual therapy sessions and self help meetings Acutely aware of the high stakes of self representation experienced clients analyze and learn to effectively perform prescribed ways of speaking a mimetic practice they call flipping the script As a clinical ethnography Scripting Addiction examines how decades of clinical theorizing about addiction language self knowledge and sobriety is manifested in interactions between counselors and clients As an ethnography of the contemporary United States the book demonstrates the complex cultural roots of the powerful clinical ideas that shape therapeutic transactions and by extension administrative routines and institutional dynamics at sites such as Fresh Beginnings
