manner by which structural resistance is provided Form Arches and Cables Sections Beams Slabs and Columns Vectors Trusses and Space Frames Surfaces Shells and Plates and Frames Connections and High Rises The design exercises featured in each chapter use the Think Make Break method of reiterative design to develop and evaluate different structural options A variety of structural design tools will be used including the human body physical models historical precedents static diagrams traditional formulae and advanced digital analysis The book can be incorporated into various course curricula and studio exercises because of the flexibility of the format and range of expertise required for these explorations More than 500 original illustrations and photos provide example solutions and inspiration for further design exploration
