Human-Computer Interaction - INTERACT 2023 José Abdelnour Nocera,Marta Kristín Lárusdóttir,Helen Petrie,Antonio Piccinno,Marco Winckler,2023-08-24 The four volume set LNCS 14442 14445 constitutes the proceedings of the 19th IFIP TC 13 International Conference on Human Computer Interaction INTERACT 2023 held in York UK in August September 2023 The 71 full papers and 58 short papers included in this book were carefully reviewed and selected from 406 submissions They were organized in topical sections as follows 3D Interaction Accessibility Accessibility and Aging Accessibility for Auditory Hearing Disabilities Co Design Cybersecurity and Trust Data Physicalisation and Cross device Eye Free Gesture Interaction and Sign Language Haptic interaction and Healthcare applications Self Monitoring Human Robot Interaction Information Visualization Information Visualization and 3D Interaction Interacting with Children Interaction with Conversational Agents Methodologies for HCI Model Based UI Design and Testing Montion Sickness Stress and Risk perception in 3D Environments and Multisensory interaction VR experiences Natural Language Processing and AI Explainability Online Collaboration and Cooperative work Recommendation Systems and AI Explainability Social AI Social and Ubiquitous Computing Social Media and Digital Learning Understanding Users and Privacy Issues User movement and 3D Environments User Self Report User Studies User Studies Eye Tracking and Physiological Data Virtual Reality Virtual Reality and Training Courses Industrial Experiences Interactive Demonstrations Keynotes Panels Posters and Workshops

Future Crimes Marc Goodman,2015-02-24 NEW YORK TIMES and WALL STREET JOURNAL BESTSELLER ONE OF THE WASHINGTON POST S 10 BEST BOOKS OF 2015 One of the world s leading authorities on global security Marc Goodman takes readers deep into the digital underground to expose the alarming ways criminals corporations and even countries are using new and emerging technologies against you and how this makes everyone more vulnerable than ever imagined Technological advances have benefited our world in immeasurable ways but there is an ominous flip side our technology can be turned against us Hackers

can activate baby monitors to spy on families thieves are analyzing social media posts to plot home invasions and stalkers are exploiting the GPS on smart phones to track their victims every move We all know today s criminals can steal identities drain online bank accounts and wipe out computer servers but that s just the beginning To date no computer has been created that could not be hacked a sobering fact given our radical dependence on these machines for everything from our nation s power grid to air traffic control to financial services Yet as ubiquitous as technology seems today just over the horizon is a tidal wave of scientific progress that will leave our heads spinning If today s Internet is the size of a golf ball tomorrow s will be the size of the sun Welcome to the Internet of Things a living breathing global information grid where every physical object will be online But with greater connections come greater risks Implantable medical devices such as pacemakers can be hacked to deliver a lethal jolt of electricity and a car s brakes can be disabled at high speed from miles away Meanwhile 3 D printers can produce AK 47s bioterrorists can download the recipe for Spanish flu and cartels are using fleets of drones to ferry drugs across borders With explosive insights based upon a career in law enforcement and counterterrorism Marc Goodman takes readers on a vivid journey through the darkest recesses of the Internet Reading like science fiction but based in science fact Future Crimes explores how bad actors are primed to hijack the technologies of tomorrow including robotics synthetic biology nanotechnology virtual reality and artificial intelligence These fields hold the power to create a world of unprecedented abundance and prosperity But the technological bedrock upon which we are building our common future is deeply unstable and like a house of cards can come crashing down at any moment Future Crimes provides a mind blowing glimpse into the dark side of technological innovation and the unintended consequences of our connected world Goodman offers a way out with clear steps we must take to survive the progress unfolding before us Provocative thrilling and ultimately empowering Future Crimes will serve as an urgent call to action that shows how we can take back control over our own devices and harness technology s tremendous power for the betterment of humanity before it s too late
