Contemporary Issues in Soviet Foreign Policy Erik Hoffmann, 2017-09-04 This survey of writings on the debates about and events relating to Soviet foreign policy concentrates on the Gorbachev period Changes in Soviet theory and foreign policy decision making are covered in the first section Twelve articles examine Gorbachevs policy towards a number of different geographic regions and several more assess the permanence of Gorbachevs foreign policy changes **Reports and Documents** United States. Congress, **The Geopolitics Of Super Power** Colin S. Gray, 2014-10-17 What is Soviet American competition all about Is the Soviet Union a security problem that the United States must solve Or is it an insecurity condition with which the U S must learn to live and if so on what terms What kind of a player is the United States in the great game of power politics In *The Geopolitics of Super Power* one of our most respected strategic theorists answers these and other questions In geopolitical terms Colin Gray sees the Soviet American antagonism as an enduring contest between a continental empire and a maritime coalition each with its distinctive character and purposes Gray explores the roots of the American style in foreign policy and strategy and how that style relates to defense options He identifies four broad alternatives for U S national security policy passive and active means of containment disengagement from foreign security commitments and the rollback of the Soviet empire Gray argues vigorously for active containment for the systematic deemphasis of nuclear weapons and for the intelligent use for deterrence and defense purposes of the West s great competitive strengths in the political economic and technological spheres *Bibliographic Guide to Soviet and East European Studies* ,1978 **The American Bibliography of Slavic and East European Studies** ,1992 Provides information on East Central Europe and the former Soviet Union Subject Catalog, 1976 Library of Congress,1976 **US**

Military Strategy and the Cold War Endgame Stephen J. Cimbala, 2014-01-14 At the end of the Cold War security concerns are more about regional and civil conflicts than nuclear or Eurasian global wars Stephen Cimbala argues that deterrence characteristics of the pre Cold War period will in the 21st century again become normative [Estimating the Size and Growth of the Soviet Economy](#) United States. Congress. Senate. Committee on Foreign Relations, 1991 **When Opponents Cooperate** Benjamin Miller, 2002 A multilevel theory of international relations that accounts for intended and unintended outcomes of cooperation and conflict **Subject Catalog** Library of Congress, **Forging China's Military Might** Tai Ming Cheung, 2014-02-24 Case studies look in detail at the Chinese space and missile industry **Air University Library Index to Military Periodicals**, 1975 **Assessing Russia's Actions in Ukraine and Syria, 2014-2022** John A. Pennell, 2024-09-11 What do Russia's actions in Ukraine and Syria particularly between 2014 and 2022 tell us about the character of modern conflict Do these actions indicate change or continuity What linkages are there between Russia's approaches to warfare today with those before during and after the Soviet era Assessing Russia's Actions in Ukraine and Syria 2014 2022 Implications for the Changing Character of War investigates how Russia's actions in Syria and Ukraine reveal more continuity than change and more evolution than revolution in warfare These actions mostly reflect what the Kremlin perceives as changes in strategic and technological contexts which impacts who fights wars and how wars are fought Given historic cultural and other ties between Russia and Ukraine Russia's activities in Ukraine prior to 2022 are not easily replicable outside of the post Soviet space This book argues that new generation warfare political warfare or full spectrum conflict better describes Russia's activities than hybrid warfare John A Pennell addresses critical gaps in research by considering the totality of Russia's actions and gleanings insights from those directly involved with aspects of Russia's interventions **Bulletin of the Atomic Scientists**, 1987-09 [Interpreting China's Military Power](#) Ka Po Ng, 2005-08-09 Although inter state tensions have generally been easing after the Cold War military power remains a dominant factor in Asian regional politics As China operating the world's largest army grows stronger there are ongoing debates over the implications for Asia's regional security This book argues that it is imperative to look beyond the empirical observations and conventional materialist reading of Chinese military development to understand its dynamics and directions in doctrinal terms and put it in a readiness context for evaluation Military doctrine has long been under studied and is often treated as a subject separate from force development But as this study contends this factor is necessary for interpreting the making and purposes of China's military power because it forms the intellectual foundation of military structural and hardware development When loaded with political rhetoric it also communicates to us the intended uses of the military power The role of doctrine is reinforced in the context of military readiness which defines what for and how the army is getting ready Force development is evaluated in structural operational and directional terms The importance of this analytical framework based on military doctrine and readiness is demonstrated in a survey of the evolution of Chinese military doctrine and force

development As the Chinese People's Liberation Army has continued to adjust its military structure and operation to follow the doctrinal lead its switches between the doctrines of local war and total war have seen corresponding changes to the emphasis between operational and structural readiness
